

N321 Adult Health I

Clinical Reflection Form

Name: Vanessa Jackson

Date: 12/13/23

End of clinical Journal

1. Briefly write about your experience(s)

Overall, I had a good learning experience. I was able to rotate thru all the assigned departments and get a glimpse of each. The preceptors I had were welcoming and knowledgeable.

2. What are things you learned?

I learned the most about the cancer center and how it operates. I was very ignorant to the chemo/radiation process, so it was cool to see how things are actually done.

3. What are things you would do differently?

I think there should be a little more thought put into scheduling student's concept maps. It was kind of unfair that some would have their due on a week there was multiple exams and others had theirs on a week we had none.

4. What is your major "take home" from clinical experience(s)?

That taking care of patients is only part of it. I enjoyed the moments I got to talk to them and learn about them. It changes the tone of the care they receive when you show interest in them overall. I understand that sometimes you cannot if you're too busy but just even a simple question or gesture goes a long way.

5. Is there anything else you would like to mention?

I liked that Professor Henry was flexible in the sense of letting us change what our assigned area was for that day. For instance, my last day I was scheduled for 4E, but she was able to switch me to PACU since I did not get to go there yet.
