

N321 Adult Health I

Clinical Reflection Form

Name: Opeoluwa Babatunde

Date: 12/14/2023

End of clinical Journal

1. Briefly write about your experience(s)

I think that I had some really good experiences during clinical. I was able to use knowledge of things that I learned in class to perform better during clinical. I always thought that every time I learned something in class, I would see it in clinical. It was a good experience and it helped me put things together in terms of what I would see when dealing with certain disease processes.

2. What are things you learned?

I learned how to deal with acute patients that were suffering real emergencies. I also learned how to start IVs and got really good at that.

3. What are things you would do differently?

I would work out my work schedule differently so that I wouldn't be so tired during clinical, especially during the last few weeks

4. What is your major "take home" from clinical experience(s)?

Biggest take home is to learn how to prioritize my time, not just in the nursing world but also for me.

5. Is there anything else you would like to mention?
