

N321 Adult Health I
Clinical Reflection Form

Miranda Sentelle

Date: 12/13/2023

End of Clinical Journal

1. Briefly write about your experience(s)

Overall, I had an amazing clinical experience. Rotating our clinical from the afternoon to the morning halfway into the semester was a great experience. I was able to watch and learn from the nurses reporting to each other, the doctors making rounds on the patients and passing out medication. I also like the rotating to different specialties. I enjoyed my clinical routine in the Emergency Department.

2. What are things you learned?

Things I have learned are certain medications and why we were giving the medication to the patient instead of just passing out meds. I became knowledgeable about finding a healthy vein and how to start an IV. I had the opportunity to learn about and treat patients with different illnesses.

3. What are things you would do differently?

I wouldn't do anything differently.

4. What is your major "take home" from clinical experience(s)?

A major "take home" from clinical experience(s) would be properly caring for the patient, specifically on their needs.

5. Is there anything else you would like to mention?

No, there is nothing else I would like to mention.
