Topics To Review

Management of Care (1 item)

Management of Care (1 item)

Postoperative Nursing Care: Priority Intervention for a Group of Clients (Active Learning Template - Basic Concept)

Safety and Infection Control (2 items)

Safety and Infection Control (2 items)

Emergency Nursing Principles and Management: Community Teaching About First Aid for Snake Bites (Active Learning Template - Basic Concept)

Tuberculosis: Precautions for the Prevention of Disease Transmission (Active Learning Template - System Disorder)

Basic Care and Comfort (1 item)

Basic Care and Comfort (1 item)

Polycystic Kidney Disease, Acute Kidney Injury, and Chronic Kidney Disease: Anticipating Dietary Recommendations (Active Learning Template - System Disorder)

Pharmacological and Parenteral Therapies (5 items)

Pharmacological and Parenteral Therapies (5 items)

Anesthesia and Moderate Sedation: Identifying an Anesthetic Medication for a Colonoscopy (Active Learning Template - Basic Concept)

Gastrointestinal Therapeutic Procedures: Possible Complications of Total Parenteral Nutrition (Active Learning Template - Therapeutic Procedure)

Heart Failure and Pulmonary Edema: Teaching a Client About Furosemide (Active Learning Template - Medication)

Inflammatory Disorders: Identifying Adverse Effects of Prednisone (Active Learning Template - Medication)

Parkinson's Disease: Discharge Teaching About Carbidopa/Levodopa (Active Learning Template - Medication)

Reduction of Risk Potential (7 items)

Reduction of Risk Potential (7 items)

Cancer Treatment Options: Discharge Teaching Following Chemotherapy (Active Learning Template - Therapeutic Procedure)

Chronic Obstructive Pulmonary Disease: Teaching About Nutrition (Active Learning Template - System Disorder)

Gastrointestinal Diagnostic Procedures: Teaching About Fecal Occult Blood Testing (Active Learning Template - Diagnostic Procedure)

Meningitis: Assessing for Kernig's Sign (Active Learning Template - Diagnostic Procedure)

Musculoskeletal Diagnostic Procedures: Teaching About Electromyography (Active Learning Template - Diagnostic Procedure)

Neurologic Diagnostic Procedures: Teaching About Electroencephalography (Active Learning Template - Diagnostic Procedure)

Respiratory Management and Mechanical Ventilation: Teaching About Using a Continuous Positive Airway Pressure Device (Active Learning Template - Therapeutic Procedure)

Physiological Adaptation (7 items)

Physiological Adaptation (7 items)

Diabetes Mellitus Management: Evaluating Client Understanding of Hypoglycemia Treatment (Active Learning Template - System Disorder)

Electrolyte Imbalances: Manifestations of Hyponatremia (Active Learning Template - System Disorder)

Esophageal Disorders: Client Education About GERD (Active Learning Template - System Disorder)

Infections of the Renal and Urinary System: Caring for a Client Who Has Acute Glomerulonephritis (Active Learning Template - System Disorder)

Inflammatory Bowel Disease: Priority Finding to Report for a Client Who Has Suspected Appendicitis (Active Learning Template - System Disorder)

Pneumothorax, Hemothorax, and Flail Chest: Manifestations of Pulmonary Trauma (Active Learning Template - System Disorder)

Polycystic Kidney Disease, Acute Kidney Injury, and Chronic Kidney Disease: Evaluating Client Understanding of Nephrotic Syndrome (Active Learning Template - System Disorder)

Outcomes

Nursing Process	No of Points	Individual Score	Description
RN Assessment	5	60.0%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	7	71.4%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Planning	8	50.0%	The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measurable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals.
RN Implementation/Therapeutic Nursing Intervention	24	58.3%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.
RN Evaluation	6	16.7%	The evaluation step of the nursing process involves the nurse's ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which the client has met the goals and outcomes. During this step the nurse will also assess client/staff understanding of instruction, the effectiveness of interventions, and identify the need for further intervention or the need to alter the plan.
Priority Setting	No of Points	Individual Score	Description
	6	66.7%	Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients.
Thinking Skills	No of Points	Individual Score	Description
Foundational Thinking	7	42.9%	The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding.
Clinical Application	43	55.8%	The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.

NCLEX®	No of Points	Individual Score	Description
RN Management of Care	3	66.7%	The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients.
RN Safety and Infection Control	4	50.0%	The nurse uses preventive safety measures to promote the health and well-being of clients, significant others, and members of the health care team.
RN Health Promotion and Maintenance	2	100.0%	The nurse directs nursing care to promote prevention and detection of illness and support optimal health.
RN Psychosocial Integrity	2	100.0%	The nurse directs nursing care to promote and support the emotional, mental and social well-being of clients and significant others.
RN Basic Care and Comfort	4	75.0%	The nurse provides nursing care to promote comfort and assist client to perform activities of daily living.
RN Pharmacological and Parenteral Therapies	9	44.4%	The nurse administers, monitors and evaluates pharmacological and parenteral therapy.
RN Reduction of Risk Potential	11	36.4%	The nurse directs nursing care to decrease clients' risk of developing complications from existing health disorders, treatments or procedures.
RN Physiological Adaptation	15	53.3%	The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.

QSEN	No of Points	Individual Score	Description
Safety	11	63.6%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Patient-Centered Care	12	58.3%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	25	44.0%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.
Teamwork and Collaboration	2	100.0%	The delivery of client care in partnership with multidisciplinary members of the health care team, to achieve continuity of care and positive client outcomes.

NLN Competency	No of Points	Individual Score	Description
Human Flourishing	10	60.0%	Human flourishing is reflected in patient care that demonstrates respect for diversity, approaches patients in a holistic and patient-centered manner, and uses advocacy to enhance their health and well-being.
Nursing Judgment	30	53.3%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.
Professional Identity	2	100.0%	Professional identity reflects the professional development of the nurse as a member and leader of the health care team who promotes relationship-centered care, and whose practice reflects integrity and caring while following ethical and legal guidelines.
Spirit of Inquiry	8	37.5%	A spirit of inquiry is exhibited by nurses who provide evidence based clinical nursing practice and use evidence to promote change and excellence.

BSN Essentials	No of Points	Individual Score	Description
Liberal Education for Baccalaureate Generalist Nursing Practice	9	55.6%	The need for an education that exposes nurses to multiple fields of study providing the foundation for a global perspective of society as well as high level thinking and acquisition of skills that can be applied to complex patient and system-based problems.
Basic Organization and Systems Leadership for Quality Care and Patient Safety	1	100.0%	The need for nurses to be able to understand power relationships and use decision-making and leadership skills to promote safe practice and quality improvement within health care systems.
Scholarship for Evidence-Based Practice	24	45.8%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
Interprofessional Communication and Collaboration	2	100.0%	The need for nurses to be able to function as a member of the healthcare team while promoting an environment that supports interprofessional communication and collaboration with the goal of providing patient-centered care.
Clinical Prevention and Population Health	8	50.0%	The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice.
Baccalaureate Generalist Nursing Practice	6	66.7%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.

AACN Essentials	No of Points	Individual Score	Description
Knowledge for Nursing Practice	5	80.0%	Integration, translation, and application of established and evolving disciplinary nursing knowledge and ways of knowing, as well as knowledge from other disciplines, including a foundation in liberal arts and natural and social sciences. This distinguishes the practice of professional nursing and forms the basis for clinical judgment and innovation in nursing practice.
Person-Centered Care	41	53.7%	Person-centered care focuses on the individual within multiple complicated contexts, including family and/or important others. Person-centered care is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate. Person-centered care builds on a scientific body of knowledge that guides nursing practice regardless of specialty or functional area.
Population Health	3	0.0%	Population health spans the healthcare delivery continuum from public health prevention to disease management of populations and describes collaborative activities with both traditional and non-traditional partnerships from affected communities, public health, industry, academia, health care, local government entities, and others for the improvement of equitable population health outcomes.
Personal, Professional, and Leadership Development	1	100.0%	Participation in activities and self-reflection that fosters personal health, resilience, and well-being; contributes to lifelong learning; and supports the acquisition of nursing expertise and the assertion of leadership.

Score Explanation and Interpretation

Individual Performance Profile

ITEM SCORING

ATI follows NCSBN guidance for item scoring. Accordingly, each item is worth one or more points. Depending on the item-specific scoring method, a student's response may earn full, partial, or no points.

INDIVIDUAL SCORE

The individual score is the number of points received divided by the number of points on the assessment. It is on a scale of 0% to 100%.

TOPICS TO REVIEW

Based on the questions missed on this assessment, a listing of content areas and topics to review may be provided. A variety of learning resources may be used in the review process, including content, images, animations, and videos in ATI's Content Mastery Series® Review Modules, online practice assessments, and a focused review that is individualized to the questions missed.
