

N431 Adult Health II

Clinical Reflection Form

Name: Presley King

Date: 2/5/24

Clinical Rotation Site: PACU

1. Briefly write about today's experience(s)

Today, I was in PACU. I got there early, and the nurses came in for their shift. There were 44 surgeries today. I also saw this in a meeting with the charge nurse and manager. I shadowed a few nurses when they had patients come in. The surgeries ranged from tubes in children's ears to car wrecks.

2. What is one thing you learned?

I learned that if a patient has low respiration, the nurse should tilt their head back and push their thumbs into the back of their jaw.

3. What is one thing you would do differently?

I would tour the surgery part more. I only stayed in phase 1.

4. What is your major "take home" from today's clinical experience(s)?

PACU is an underrated place to work. It was a great environment to be in and the nurses loved their job. They had great hours and did not work weekeneds.

5. Is there anything else you would like to mention?

No
