

N321 Adult Health I

Clinical Reflection Form

Name: Julia Bushnell

Date: 2/28/2024

Mid Term Journal

1. Discuss how you are feeling so far in clinical?

So far I have enjoyed this clinical and have been offered several opportunities to do things I haven't done so far.

2. What have been good experiences?

Getting to be hands on and practice skills such as IM injections, IV's, medication administration, and parenteral feeding. I have also enjoyed working with my preceptors.

3. Have there been any bad experiences? Could be you arrvous about a skill or communication?

I have not had any bad experiences at clinical so far. I am still nervous for IV's since I have not successfully started one, but I do not hesitate to try.

4. Do you need to talk with anyone in private to discuss clinical?

No.

5. Is there anything else you would like to mention?

No, thank you.
