

N321 Adult Health I

Clinical Reflection Form

Name: Erica Stevenson

Date: 02/29/2024

Mid Term Journal

1. Discuss how you are feeling so far in clinical?

So far, I feel decent in clinical. I think I am getting a better grasp of what is expected of us as well as having a better feel for how the floor works. I enjoy rotating through different areas to see how nursing care changes based on the specialty.

2. What have been good experiences?

I really enjoyed going to the OR as well as ER. It was a nice change of pace and it also allowed for some insight into what fields are out there. I have had a good time on the DEU as well. Jenny is fantastic, and my first preceptor who was floating from ICU gave me a lot of practice with medications.

3. Have there been any bad experiences? Could be you nervous about a skill or communication?

I haven't had any bad experiences so far. We have had a couple of difficult situations, such as a patient death and angry patients. However, I think our preceptors have done well at handling those situations and allowing us to participate where appropriate. I am nervous about most skills we have learned due to not having many opportunities to practice them.

4. Do you need to talk with anyone in private to discuss clinical?

Not as of right now, I feel good about how it is going so far.

5. Is there anything else you would like to mention?

No, not at this time.
