

N321 Adult Health I

Clinical Reflection Form

Name: Madalyn Goble

Date: 2/29/2024

Mid Term Journal

1. Discuss how you are feeling so far in clinical?

So far in clinical, I am feeling really good. I think I am learning a lot and have enjoyed working with my preceptors. I really like Jenny and how she is willing to let me do things and explain skills that I do not understand. I also like how Professor Henry is informative when we come to her with questions but how she also does not hover and lets us learn from the preceptors.

2. What have been good experiences?

One really good experience I have had is when I was able to start an IV on a client in the Emergency Department. The Emergency Department has been my favorite experience of the entire clinical. On the fourth-floor unit, I was able to witness an emergent situation where a client's dialysis port began bleeding. I was instructed to grab a stat set of vitals and then was able to witness the nurse and infection control nurse change the dressing on the port after testing the patency of it.

3. Have there been any bad experiences? Could be you nervous about a skill or communication?

I personally have not had any bad experiences during this clinical with any nurses or clients. I am not totally comfortable with doing a head-to-toe assessment as I have not done as many of them. I also have not done many medication administrations so I would like to do more.

4. Do you need to talk with anyone in private to discuss clinical?

No, I do not need to discuss this clinical privately.

5. Is there anything else you would like to mention?

There is nothing else that I need to mention.
