<p>Evaluation of Teaching Presentation</p> <p>Introduction of content</p> <p>Patient put at ease</p> <p>Eye contact</p> <p>Clear speech and organized presentation</p> <p>Environment conducive to learning</p> <p>Family included (if applicable)</p> <p>Accuracy of information</p> <p>Validation of learning status</p> <p>Use of teaching aids</p> <p>Appropriate non-verbal body language</p>	<p>Missing 2 or more of the following criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	<p>Missing 1 of the following criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	<p>Includes all criteria:</p> <ul style="list-style-type: none"> • Introduction of content • Patient put at ease • Eye contact • Clear speech and organized presentation • Environment conducive to learning • Family included (if applicable) • Accuracy of information • Validation of learning status • Use of teaching aids • Appropriate non-verbal body language 	
TOTAL				/30

Assessment of Client/Family (5 points)	Nursing Diagnosis & Goal of Teaching (5 points)	Interventions (5 points)	Methods/Teaching Tools (2 points)	Evaluation (3 points)
<p>Patient was not easily motivated for any sort of learning or education. Patient stated many times “ready to give up” due to being in pain all the time and cannot care for herself.</p> <p>Barriers to effective learning: Patient is very hard of hearing; stood directly in front of patient when conversing.</p> <p>Health beliefs/values: Patient denied having any health beliefs or values to be honored.</p> <p>Psychosocial development: Patient’s psychosocial development is negatively influenced due to her lack of motivation for learning and lack of self-esteem.</p> <p>Cognitive development: Cognitive development is appropriate for</p>	<p>Nursing Diagnosis: Deficient knowledge related to post operation recovery as evidenced by inadequate interest in learning (Herdman & Kamitsuru, 2021, pg. 331)).</p> <p>Goal of Teaching: For patient to express readiness for enhanced knowledge related to post operation recovery and carry out these actions to assist in her healing and pain management. Patient will express an understanding of the post operative ambulation exercises necessary.</p>	<p>Intervention 1: Clear explanation of the importance of the post operative ambulation and exercises in improving pain and healing process.</p> <p>Intervention 2: Facilitate goal setting related to the learning material- patient will ambulate 3 times daily with assistance of 2 (Doenges et al., 2022, pgs. 568-572).</p> <p>Intervention 3: Instruct patient on fall preventative measures that will be taken; clearing the floor of any objects, non-skid socks, walker and gait belt, bed alarm.</p>	<p>Method 1: Visual demonstration of the post operative exercises needed to be done daily and have patient demonstrate.</p> <p>Method 2: Question and answer method after the teaching plan</p>	<p>Discuss how the client/family received the teaching: Patient was not resistant to learning and expressed cooperation in the methods of teaching. Patient participated in learning process. Family was not present.</p> <p>Identify strengths/weaknesses of the client or family in receiving teaching: Patient was more understanding of the importance of these post operative measures once it was clear that they can help her with pain management and feeling better.</p> <p>Suggest modifications to improve teaching plan (what would have improved the plan?): Printed visuals for the patient to keep and or read on post operative education and</p>

developmental age.				ambulation.
