

N431 Adult Health II

Clinical Reflection Form

Name: Whisper Brown

Date: 3/25/2024

Clinical Rotation Site:

1. Briefly write about today's experience(s)
  - a. During my rotation to radiology, I got to witness an IV sedation for an MRI. This MRI was performed to look further into a patient upper back. In this MRI they were trying to decipher between a hematoma and a lipoma. I also got to practice an IV on one of the nurses on the floor.
2. What is one thing you learned?
  - a. One thing I learned during my time on radiology was the how frequent the nurse gives IV sedation when it comes to a patient. I learned that you give IV sedation every 3 minutes up the 6 doses depending on how the patient in feeling how and the vitals are looking. I also learned some tips and tricks from one of the nurses on how to start an IV.
3. What is one thing you would do differently?
  - a. One thing I would do differently is I would try to be more involved in the MRI and ask more questions about the IV sedation.
4. What is your major "take home" from today's clinical experience(s)?
  - a. My major take home from today are the tips and tricks I got on starting an IV. I will be able to take this home and it'll help me in the future with Carle and my future IV starts.
5. Is there anything else you would like to mention?
  - a. Tammi is absolutely amazing! She is so nice and she let me start an IV on her and she gave me some useful tips.
