

N321 Adult Health I

Clinical Reflection Form

Name: Julia Bushnell

Date: 4/22/2024

End of clinical Journal

1. Briefly write about your experience(s)

I enjoyed this clinical, it has probably been my favorite one so far. I liked rotating the units we were on each week and having a consistent preceptor on the DEU. I wish I could have gotten to experience PACU and the ambulatory unit on a busier day but hopefully next semester I can get that experience.

2. What are things you learned?

I learned about feeding tubes and got familiar with IV pumps and medications. I also got to watch a lumbar puncture.

3. What are things you would do differently?

If I could do things differently, I would ask to be more hands on in the emergency department specifically, I feel like I did the least there.

4. What is your major "take home" from clinical experience(s)?

There is still a lot to learn and I would like to get more familiar with charting in Epic next semester.

5. Is there anything else you would like to mention?

I liked the way this clinical was structured and Professor Henry made this clinical experience more comfortable!
