ADJUSTED INDIVIDUAL TOTAL SCORE 76.3% TIME SPENT 01:14:03	Individual Name: Jessica A Warren Student Number: 7565966 Institution: Lakeview CON Program Type: BSN Test Completed Date: 8/23/2024 # of Points: 103	Focused Review Progress View missed topics and launch study materials below. Last accessed: 8/29/2024 Time spent: 01:51:58 Review
--	---	---

Main Category #1: Psychosocial Integrity

Subcategory: Therapeutic Communication

Topic: Effective Communication: Responding to a Client Who Has Depression

- Be mindful of tone of voice as this can communicate the nurse's feelings (Assessment Technologies Institute, 2022).
- Speaking rapidly could come off as the nurse is in a rush and doesn't have time for the client (Assessment Technologies Institute, 2022).
- Having a nonjudgmental attitude will display acceptance that will encourage open, honest communication (Assessment Technologies Institute, 2022).

Subcategory: Therapeutic Environment

Topic: Hospitalization, Illness, and Play: Actions to Take for a Preschooler Who Is in an Acute Care Facility

- Provide developmentally appropriate activities (Assessment Technologies Institute, 2022).
- Maintain routine as much as possible (Assessment Technologies Institute, 2022).
- Explain treatments, procedures, and cares to the child (Assessment Technologies Institute, 2022).

Main Category #2: Physiological Adaptation

Subcategory: Alterations in Body Systems

Topic: Amputations: Postoperative Interventions

- Monitor Capillary refill by comparing extremities (Assessment Technologies Institute, 2022).
- Observe for edema, necrosis, and lack of hair distribution of the extremities which indicates inadequate circulation (Assessment Technologies Institute, 2022).
- Monitor for manifestations of infection and non-healing of incision (Assessment Technologies Institute, 2022).

Topic: Postpartum Disorders: Interventions for a Client Who Has DVT

- Facilitate bed rest and elevation of the extremity above the level of the heart (Assessment Technologies Institute, 2022).
- Avoid using a knee gatch or a pillow under the clients knees (Assessment Technologies Institute, 2022).
- Do not massage the affected limb to prevent the thrombus from dislodging (Assessment Technologies Institute, 2022).

Subcategory: Pathophysiology**Topic: Esophageal Disorder: Manifestations of a Sliding Hiatal Hernia**

- Avoid eating immediately prior to going to bed (Assessment Technologies Institute, 2022).
- Avoid straining or excessive vigorous exercise (Assessment Technologies Institute, 2022).
- Avoid wearing clothing that is tight around the abdomen (Assessment Technologies Institute, 2022).

Main Category #3: Clinical Judgement**Subcategory: Recognize Cues****Topic: Complications Related to the Labor Process: Findings that Require Immediate Follow-Up**

- Bleeding (Assessment Technologies Institute, 2022).
- Shoulder dystocia (Assessment Technologies Institute, 2022).
- Premature rupture of membranes (Assessment Technologies Institute, 2022).

Subcategory: Analyze Cues**Topic: Complications Related to the Labor Process: Identifying Findings Consistent with Chorioamnionitis or Preeclampsia**

- Patient has a tender or painful uterus (Assessment Technologies Institute, 2022).
- Patient or the baby has a rapid heart rate (Assessment Technologies Institute, 2022).
- Vaginal discharge that has an unpleasant smell or unusual color (Assessment Technologies Institute, 2022).

Subcategory: Prioritize Hypotheses**Topic: Complications Related to the Labor Process: Priority Findings to Report to the Provider**

- Prolapse of the umbilical cord (Assessment Technologies Institute, 2022).
- Uterine rupture (Assessment Technologies Institute, 2022).
- Amniotic fluid embolism (Assessment Technologies Institute, 2022).

Subcategory: Generate Solutions**Topic: Complications Related to the Labor Process: Identifying Interventions as Anticipated or Contraindicated**

- Fetal distress- anticipated intervention: position the mother on her left side (Assessment Technologies Institute, 2022).
- Fetal distress- anticipated intervention: discontinue labor augmenting agents (Assessment Technologies Institute, 2022).
- Active genital herpes- vaginal delivery is contraindicated (Assessment Technologies Institute, 2022).

Subcategory: Take Action**Topic: Fetal Assessment During Labor: Interventions for Recurrent Variable Decelerations**

- Reposition client from side to side or into knee-chest (Assessment Technologies Institute, 2022).
- Discontinue oxytocin if being infused (Assessment Technologies Institute, 2022).
- Perform or assist with a vaginal examination (Assessment Technologies Institute, 2022).

Topic: Pain Management: Nursing Interventions for a Client Following Administration of an Epidural

- Monitor maternal vital signs per facility protocol (Assessment Technologies Institute, 2022).
- Monitor for allergic reaction (Assessment Technologies Institute, 2022).
- Continue FHR pattern monitoring (Assessment Technologies Institute, 2022).

Subcategory: Evaluate Outcomes**Topic: Substance Use and Addictive Disorders: Identifying Manifestations of a Client**

- Appearing fearful, anxious, or paranoid, with no reason (Assessment Technologies Institute, 2022).
- Sudden weight loss or weight gain (Assessment Technologies Institute, 2022).
- Withdrawing from friends and family (Assessment Technologies Institute, 2022).
