

VANESSA JACKSON

SELF REFLECTION JOURNAL FOR CLINICAL EXPERIENCE (2)

Family Medicine/self-reflection assignment

See grading rubric below

1. How does the clinical site relate to Population/Global Health?

The family medicine clinical site relates to population/global health by delivering preventive and community-focused care. Family medicine provides preventive services such as vaccinations, screenings, and education. They also offer care that addresses acute and chronic illnesses. Their services are overall improving population health.

2. How were you an engaged nursing professional today?

I was engaged as a nursing professional by maintaining ethical and professional standards. My preceptor's workload did not involve direct patient care that day. Her workload included follow-up phone calls and messages with patients. I was able to listen in and review pertinent medical history with her. As a nursing professional, maintaining patient confidentiality and adhering to HIPAA policies are crucial.

3. How did you contribute to the service of the community today?

I contributed to the service of the community today by engaging in clinical administrative practices with my preceptor. I was able to participate in some clinic operations which contributes to the overall effectiveness of the site and better service the community. (I was not able to service the community directly).

4. Name 3 ways this clinical site impacts the community health?

A family medicine clinic impacts community health by helping patients manage their diseases such as diabetes, hypertension, asthma, etc. They help control the patient's symptoms which results in improving their quality of life. Family medicine offers preventive health measures which directly correlates with community health. The preventive services they offer helps to reduce the incidence of diseases within the community. Lastly, family medicine also enhances access to primary care services which permits the community to receive the necessary medical attention.

5. Name 1 way this site could better serve the community and why?

The site could improve by creating longer appointments or staffing more physicians. The physicians had a full day of appointments with an hour lunch break. A lot of the patients being seen had chronic conditions, so their appointment times would run over into the next one. That led to the physician being behind for majority of the day and it is not fair to them or the patient.

6. What health risks are experienced by the population served by today's clinical site?

Most health risks experienced were those of chronic conditions (diabetes and asthma management) and mental health. One appointment on schedule was to discuss the results of a breast tissue biopsy.
