Simulation		
Scenario	In this virtual simulation, you cared for Doris Anderson. The goal was to complete a focused cardiovascular assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You met the requirements to complete this virtual health assessment scenario.	Score: 81%
Essential Actions	Required actions - 17 of 20 correctly selected You have demonstrated a basic understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: auscultating the anterior chest, communicating with the client to elicit additional information, palpating the lower extremities, palpating the upper extremities, providing infection control and safety. Spend time reviewing: - Inspecting capillary refill of the lower extremities - Inspecting skin of the lower extremities - Inspecting skin of the upper extremities	
	Interactive actions - 6 of 8 performed correctly You did not demonstrate a basic understanding of assessment techniques within the focused health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: auscultating heart sounds, palpating dorsalis pedis pulse, palpating radial pulse, palpating skin temperature. Spend time reviewing the following assessment techniques: - Auscultating apical pulse - Inspecting capillary refill of the lower extremities	
	Expected/unexpected findings - 8 of 11 correctly identified You did not demonstrate a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: auscultating the anterior chest, palpating the lower extremities, palpating the upper extremities. Spend time reviewing the expected and unexpected findings of the following: - Inspecting capillary refill of the lower extremities - Inspecting skin of the lower extremities - Inspecting skin of the upper extremities	

Neutral Actions	Neutral actions - 8 selected Neutral actions do not help or harm the client. <i>Only</i> questions specifically related to the focused cardiovascular assessment are necessary. <i>Only</i> steps specifically related to the focused cardiovascular assessment are necessary.
Actions of Concern	Order violations - 2 selected Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to place or remove gloves when required; or fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.

EHR Chart	
Instructor Review Status	Not Reviewed
Instructor Review	This chart has not been reviewed by the instructor. This report will populate with additional information when the status has changed.
Instructor Feedback	Instructor feedback can be viewed by accessing the link on the on-line version of this report. If your instructor has enabled the Expert EHR Chart, you may view the example in the attached page.

This expert chart is intended to assist in evaluating student performance in documentation for this activity. Only the tabs and tables of the chart that warrant entries are included, and the expert responses for comparing against student responses are indicated with bold text.

Doris Anderson
MRN: 3126132
Allergies: none

DOB: 54 years old
Height: 62 in
Weight: 160 lb

Attending: Marisol Menendez MD
Code Status: Full Code
Comments: none

Notes

Note Time	Note Type	Professional Role
5.0 minutes after start	Nursing/Clinician Note	Nurse

Client reports eating oatmeal for breakfast; chicken, broccoli, and brown rice for lunch; a handful of nuts for a snack; salad and grilled fish for dinner. Drinks 8 glasses of water a day. Participated in cardiac rehab for 3 months; continues to exercise 30 minutes a day, 3 days a week, and walks outside the other days. Reports stamina has improved.

Admission Diagnosis

Other Problems/Diagnosis

History of Present Illness/Injury

Location (Where are the Symptoms located? Are they local or do they radiate?)

Duration (When did it start? How long has this problem existed? Is it getting worse? Changing?)

Heart attack 6 months ago. Had manifestations for 3 hr before going to the hospital.

Timing- (When does it occur? Night or day? At work? etc.)

Quality- (Characteristics such as constant, sharp, dull, sore)

Severity- (How bothersome is the problem? Can you sleep, work, etc?)

Describe this illness/injury related to how and where this problem began.

What makes this problem worse or better?

Signs and Symptoms

Tightness in the center of her chest and jaw, and shortness of breath.

Comments

Has been following a low sodium, low sugar diet since heart attack and reports losing 15 pounds. Reports elevated cholesterol in the past.
