

## SELF REFLECTION JOURNAL FOR CLINICAL EXPERIENCE (1-5)

Adult med

See **grading rubric below**

1. How does the clinical site relate to Population/Global Health?

This clinical relates to population and global health because it directly deals with the community. We saw all different ages that would come in for all types of different things. The community is so diverse in its needs, so it was a good learning experience for a nursing student.

2. How were you an engaged nursing professional today?

I was engaged in professional nursing today by make sure that the patients felt comfortable to ask question honestly. I allowed the nurse to lead the appointment. I introduced myself to the patient right away.

3. How did you contribute to the service of the community today?

I contributed to the service of the community today by make it a little but healthier. I administered flu shots. This in return will hopefully make the community a little bit healthier this flu season when it is at its peak. I also listened to the nurse give educating about the spread of germs and how washing your hands is the most important thing to do this upcoming season to help stop the spread of illnesses.

4. Name 3 ways this clinical site impacts the community health.

The site impacts the community by providing education about the spread of germs and how it can be prevented. They also give annual flu shots. This will help the community stay healthier together. They also give tester on shots to

men who need it. This can have a positive impact by having a healthier population.

5. Name 1 way this site could better serve the community and why?

This site could better serve the community by putting out signs of the vaccinations that they offer. They verbally tell the patient, but maybe if they had signs and charts about statistics they could read they may be more willing to get the flu vaccine.

6. What health risks are experienced by the population served by today's clinical site?

The health risk is all over. People come in for the common cold. Some come in for hormone shots. They are at risk for everything. Someone children may come in just to get a physical that the school needs to approve the play for sports.
