

SELF REFLECTION JOURNAL FOR CLINICAL EXPERIENCE (1-5)

The haven

See grading rubric below

1. How does the clinical site relate to Population/Global Health?

The clinical site relates to population because it deals with all people who need help. It will help those who need one night to stay or 3 months. It can help the homeless who are looking for places to stay and to help them get employment. They also offer them resources if they are not just wanting a place to stay.

2. How were you an engaged nursing professional today?

I was engaged today by learning the needs of the community. I asked the residents what they needed most and sat and talking to them while being respectful that this is their home. The ones who were staying there considered that their home to was professional in respecting their boundaries.

3. How did you contribute to the service of the community today?

I contributed to the service by cleaning rooms that were only meant for families. We wiped down the beds and out cleaned sheets for the next family in need. We then prepper and made dinner. We decided to make tacos for about 25 homes less people for that night. We then cleaned up the kitchen so they could eat without us.

4. Name 3 ways this clinical site impacts the community health?

This site allows people to have a safe place to stay if they are unble to find somewhere else. They also provide meals to those who do not have access to meals. They provide recourse such as helping with job applications and helping them find landlords that are willing to take people who have felonies.

5. Name 1 way this site could better serve the community and why?

I think they could have better promotions for people volunteer. The people who cook everyday who volunteers. I feel like if they posted on social media about needing volunteering to help cook it would help them out a lot.

6. What health risks are experienced by the population served by today's clinical site?

The health risks are high. Unsanitary and unstable living conditions are the top risk for this population. Drug use is also at risk because when the population can find a place to stay the night, the person housing them usually have drugs. They are also at a risk for malnourishment due to no work to pay for consistent meals.
