

SELF REFLECTION JOURNAL FOR CLINICAL EXPERIENCE (4)

County Health Department journal/self-reflection assignment

See grading rubric below

1. How does the clinical site relate to Population/Global Health?
- The clinical site relates to population and global health as it serves both the adult and pediatric population in the Danville area. It provides assistance to mothers and their young children with the program WIC, provides vaccinations to the public, and they are in the process of opening an STD clinic.
2. How were you an engaged professional today?
- I was an engaged nursing professional today as I assisted the nurse with calling back the patients, preparing the vaccinations for each patient, and documenting that the vaccination was given. I assisted the nurse with giving the pediatric patient's their vaccines and tried to ask questions throughout my time at clinical.
3. How did you contribute to the service of the community today?
- I contributed to the service of the community today by assisting the nurse with administering required and necessary vaccinations to patients in the community. I was able to help assist the nurse with giving a pediatric patient her necessary 6-month vaccinations consisting of her DTaP, Hepatitis b, and PVC 20.
4. Name 3 ways this clinical site impacts the community health?
- The Vermilion County health department impacts community health in many various ways. One way that this clinical site impacts community health is with a program for young mothers and children known as WIC. WIC helps provide pregnant mothers with assistance with milk and groceries by using vouchers that they can use at the grocery store. Another way that this clinical site impacts community health is by providing necessary vaccinations to the public at a low cost or free with their insurance. Finally, this clinical site impacts community health by constantly looking for ways that they can better serve and provide necessary care services to the community. I say this because they are currently in the process of opening an STD clinic to get tested and receive the necessary treatments which I feel is beneficial to this community.
5. Name 1 way this site could better serve the community and why?
- I would say that this site could better serve the community by adding another nurse in the clinic for vaccinations. By adding another nurse, it would allow for more patients in the community who need to be seen to get the necessary vaccinations they require and would also eliminate the stress placed upon the one nurse in the clinic.
6. What health risks are experienced by the population served by today's clinical site?
Based off my experience during this clinical rotation the health risk I would say that is highly experienced by this certain population is wellness and health promotion and prevention. During my rotation to the Vermilion County Health department I was able to see 2 pediatric patients and 2 adult patients who arrived to the clinic to receive vaccinations.
