

- How does the clinical site relate to Population/Global Health?
  - This clinical site relates to population/global health as it supports the veteran population and their families in Vermillion County. The Canon Place is able to do this by providing resources like housing, a small food pantry, cleaning resources, a gym, a computer lab, and a community center.
- How were you an engaged nursing professional today?
  - We were engaged by taking a tour of the building and were told the history of the organization and what the mission is to support the veteran population. The Outreach Services coordinator showed how they assist the community with outreach services and the benefits of donating to the non-profit organization, whether it is through donations or volunteer time.
- How did you contribute to the service of the community today?
  - We contributed to the service today by engaging with veterans that were already placed at The Canon Place by learning the organization's history and seeing the organization assist with supporting the veterans and their families. We came up with new ideas to help outreach and bring more awareness to the services available by the organization, as there are services of dental assistance, mental health groups, and health fairs that they could go to to help better the population in mental and physical health.
- Name 3 ways this clinical site impacts the community health?
  - Three ways that the clinical site impacts community health are by providing low-income housing to veterans and also providing mental and physical resources by being close to the VA. Lastly, this gives a sense of relief for the veterans, as they are able to get the help that they possibly couldn't find other places.
- Name 1 way this site could better serve the community, and why?
  - This site could possibly better help serve the community by creating more awareness and focusing on their mission. There could be more fundraisers or even more drives to help gather certain products of clothes, food, and even money donations to support the facility and even the veterans that are there currently.
- What health risks are experienced by the population served by today's clinical site?
  - Health risks that are experienced by this population, include substance abuse, mental health issues, housing instability, lack of dental, vision, and healthcare. Which might be difficult to reach for this population if not knowing where the resources are.
