

# SELF REFLECTION JOURNAL FOR CLINICAL EXPERIENCE 5

## Adult Med Clinic

### Jessica Warren

1. How does the clinical site relate to Population/Global Health?

This site provides care for adults. This clinic is run by a few doctors and residency doctors. The patients that are seen here may see a new doctor every time they come. The residency doctors do a year rotation at the clinic then move on to the next site they have to be in.

2. How were you an engaged nursing professional today?

I interacted with nurse today. We gave report of what the schedule was for the day and the nurse directed the residence doctors on things they need to be aware of. For example, one patient was supposed to have surgery the next day and the nurse reminded the residency doctor that he had to completely fill out the pre surgical assessment in its entirety or the patient wouldn't be able to get the surgery. I also watched the nurse answer questions that patients were sending in on the patient portal.

3. How did you contribute to the service of the community today?

I interacted with nurse today. We gave report of what the schedule was for the day and the nurse directed the residence doctors on things they need to be aware of. I also watched the nurse answer questions that patients were sending in on the patient portal.

4. Name 3 ways this clinical site impacts the community health?

This clinic offers care to patients who don't always show up to doctors appointments with their primary doctor. This clinic is a teaching clinic for residency doctors that will be practicing in their own specialty in the future. This clinic specializes in adults only.

5. Name 1 way this site could better serve the community and why?

It is out on the outskirts of town. It may not be an ideal place for the clientele they get. This clinic does see a lot of cancellations and no shows.

6. What health risks are experienced by the population served by today's clinical site?

Some of the population of people is a little rough. There have been a few instances of belligerent patients that have been asked to leave.
