

# Individual Performance Profile

## RN Elimination Assessment 2.0

Individual Name: <b>TINLEE SHEPHERD</b>	Individual Score: <b>90.0%</b>
Student Number: <b>8275627</b>	Practice Time: <b>13 min</b>
Institution: <b>Lakeview CON</b>	
Program Type: <b>BSN</b>	
Test Date: <b>10/8/2024</b>	

Individual Performance on the Learning Objectives				Individual Score (% Correct)										
Sub-Scale	# Items	# Points	Individual Score	1	10	20	30	40	50	60	70	80	90	100
Discuss body functions related to the production of urine and feces.	5	5	100.0%											▲
Explore expected and unexpected findings related to elimination.	5	5	100.0%											▲
Discuss conditions that alter a client's elimination patterns.	5	5	100.0%											▲
Examine the use of diversions to manage altered elimination.	5	5	100.0%											▲
Identify diagnostic tests related to elimination and the nurse's role in obtaining specimens.	5	5	80.0%											▲
Discuss nursing interventions that can facilitate or maintain a client's elimination patterns.	5	5	60.0%											▲

### Topics To Review - Incorrect

**Discuss body functions related to the production of urine and feces.**

No remediation material

**Discuss conditions that alter a client's elimination patterns.**

No remediation material

**Explore expected and unexpected findings related to elimination.**

No remediation material

**Discuss nursing interventions that can facilitate or maintain a client's elimination patterns. (2 items)**

- Identifying Bladder Irritants
- Nasogastric Tube Insertion

**Identify diagnostic tests related to elimination and the nurse's role in obtaining specimens. (1 item)**

- Fecal Occult Blood Test

**Examine the use of diversions to manage altered elimination.**

No remediation material

**Topics To Review - Correct**

**Discuss body functions related to the production of urine and feces. (5 items)**

Causes of Urine Concentration  
Expected Findings With the Production of Urine  
Identifying Age-Related Changes to the Urinary System  
Primary Function of the Urinary Tract  
Vitamin K Production

**Discuss conditions that alter a client's elimination patterns. (5 items)**

Age-Related Risk Factors for Alterations in Urinary Elimination  
Identifying Consequences of Not Treating a Urinary Tract Infection  
Identifying How Antibiotics Affect Diarrhea  
Identifying Manifestations of Dehydration  
Identifying Medication Classifications That Cause Constipation

**Explore expected and unexpected findings related to elimination. (5 items)**

Identifying Altered Elimination Patterns  
Identifying Risk Factors for Diarrhea  
Identifying Risk Factors for Urinary Retention  
Identifying Stress Incontinence  
Identifying the Correct Diet for a Client Who Has Diarrhea

**Discuss nursing interventions that can facilitate or maintain a client's elimination patterns. (3 items)**

Administering an Enema  
Assisting a Client With Bladder Training  
Educating a Client About Catheterization

**Identify diagnostic tests related to elimination and the nurse's role in obtaining specimens. (4 items)**

Clean Catch Urine Specimen  
Recognizing Cystometric Testing  
Urinalysis Testing  
Urine Culture

**Examine the use of diversions to manage altered elimination. (5 items)**

Complications of Fecal Diversions  
Diversions to Manage Altered Elimination  
Educating a Client Who Has an Ileostomy  
Monitoring for Complications of Fecal Diversions  
Nephrostomy Tube Placement
