

N431 Adult Health II

Clinical Reflection Form

Name: Presley Wendt

Date: 10/14/2024

Clinical Rotation Site: Sarah Bush

1. Briefly write about today's experience(s)

I have learned a lot of valuable skills so far throughout the semester while at clinicals. I had the opportunity to access multiple ports and start 2 IVs while at the cancer center. I also got to start 3 IVs, insert a foley catheter, and pass multiple medications while in the ER. While doing clinical rotations on the floor I have been able to pass many different medications and do multiple assessments.

2. What is one thing you learned?

I learned how to access a port on a patient. We learned how to do this in simulation lab, but I have never been able to actually do it on a person until clinical this semester.

3. What is one thing you would do differently?

One thing I would do differently is ask the nurse more questions in order to get a better learning experience.

4. What is your major "take home" from today's clinical experience(s)?

My major take home from clinicals so far this semester is that all patients are very different from one another so it is important to learn about your patients likes and dislikes in order to give them proper care.

5. Is there anything else you would like to mention?

No
