

N431 Adult Health II

Clinical Reflection Form

Name: Madalyn Goble

Date: 10/31/24

Clinical Rotation Site: CCU

1. Briefly write about today's experience(s)

Today was one of the most interesting clinicals I have experienced this far. My nurse was amazing and let me do a lot of hands-on work with the patients. I got to observe neuro assessments as well as help assess a patient that had recently lost all control of her extremities. I was able to pass meds to patients while getting to talk to them about their lives and experiences. Overall, I had a great time.

2. What is one thing you learned?

One thing I learned was how to provide care to a client that was unable to move their extremities. This was the first time I had experienced this, and it was neat to learn.

3. What is one thing you would do differently?

One thing I would do differently is ask to go see patients that were ventilated as this is something I haven't seen before.

4. What is your major "take home" from today's clinical experience(s)?

My major take home is that I really enjoyed working in critical care.

5. Is there anything else you would like to mention?

My nurse Salina was amazing, and I learned a lot from her.
