

N431 Adult Health II

Clinical Reflection Form

Name: Cassie Sanders

Date: 9/30/24

Clinical Rotation Site: Pain Clinic

1. Briefly write about today's experience(s)

Today I was in the pain clinic. This was not what I had expected, I had to change into surgical scrubs which surprised me. I followed patients from start to finish doing their initial assessments and starting IV's then I followed them into the procedure room where the doctor was great and talked me through the procedures he was doing.

2. What is one thing you learned?

In this rotation I learned that there is a lot more to the pain clinic than I ever thought. I didn't know they done procedures there and start an endless amount of IV's.

3. What is one thing you would do differently?

There isn't anything I would have done differently, I took every opportunity I could to follow someone, ask questions, and learn what they do.

4. What is your major "take home" from today's clinical experience(s)?

My major take home from this clinical experience is the amount of procedures that are done there, and how quickly people are in and out of the procedures.

5. Is there anything else you would like to mention?

There is nothing else I would like to mention. I enjoyed being able to be a part of this rotation.
