Date:

End of clinical Journal

1. Briefly write about your experience(s)

I really enjoyed this semester clinical. I enjoyed being able to be more hands on with nursing care and the nurse preceptors on every rotation site were amazing and allowed me to do a lot of skills. I enjoyed rotating to the ER even though I thought I wouldn't like it but it was probably my favorite site to be rotated to.

2. What are things you learned?

I learned many skills such as passing medications, starting IV's, observing a central line placement, observing an NG tube, and many other things.

3. What are things you would do differently?

I would have enjoyed being rotated to sites more often than just one or two times.

4. What is your major "take home" from clinical experience(s)?

My major take home experience was that every skill is worth doing and to try and be as hands on as possible.

5. Is there anything else you would like to mention?

I really enjoyed clinical this semester and I had a lot of great experiences. I am excited for the upcoming semesters!!
