

N322 Introduction to Pharmacology
Proctored ATI Remediation Template

Student Name: Ginaveve Jessup
Assessment Name: RN Pharmacology 2023 Proctored Assessment
Semester: 2

Instructions:

1. Download the report from your ATI product for the assessment you are completing this remediation template for
2. The report will be broken down into three (3) aspects:
 - a. Categories
 - i. These categories mimic the NCLEX-RN categories and include the following:
 1. Management of Care
 2. Safety and Infection Control
 3. Health Promotion and Maintenance
 4. Psychosocial Integrity
 5. Basic Care and Comfort
 6. Pharmacological and Parenteral Therapies
 7. Reduction of Risk Potential
 8. Physiological Adaptation
 - b. Subcategories
 - c. Topics
3. Complete the template on the following page by doing the following:
 - a. Main Category
 - i. Subcategories for each main category
 1. Topics for each subcategory → these will be the content areas you will be remediating on
 - a. Provide three (3) critical points to remember for each topic → these will come from the Focused Review module(s) within your ATI product
 - b. NOTE: You must remediate on all subcategories AND topics within the main categories listed under the “Topics to Review” section of the ATI report for this assessment.**
4. In the event you need additional space within the table, please add rows into the table to accommodate this
 - a. In the event, you need less space within the table than what is provided, you may delete those rows from the table to accommodate this OR put “N/A” → There may be main categories that you don’t have to remediate on and that is OK – you can either delete the table OR put “N/A”
5. An example is provided below:

SAMPLE Main Category: Management of Care
SAMPLE Subcategory: Case Management
SAMPLE Topic: Anemias: Discharge Teaching for a Client Who is Recovering from Sick Cell Crisis <ul style="list-style-type: none">• SAMPLE Critical Point #1: Anemia is the abnormally low amount of circulation RB, Hgb concentration, or both.• SAMPLE Critical Point #2: When a patient is going through sickle crisis, the nurse should monitor oxygen saturation to determine a need for oxygen therapy.• SAMPLE Critical Point #3: A patient should have their hemoglobin checking in 4 to 6 weeks to determine efficacy.

6. Once the template is completed **and** at least the minimum remediation time has been completed within the Focused Review module(s) in ATI, upload the template to the corresponding dropbox in E360.

Main Category: Clinical Judgement

Subcategory: Analyze cues

Topic: Medication affecting coagulation: analyzing cues for a client who is prescribed warfarin

- Monitor for hemorrhage
- Monitor for warfarin toxicity
- Monitor vital signs

Topic: N/A

-
-
-

Topic: N/A

-
-
-

Subcategory: Generate solutions

Topic: Vitamins and minerals: caring for a client who has iron deficiency anemia

- Monitor for GI distress
- This medication can stain your teeth
- Anaphylaxis can occur so IV is safer than IM.

Topic: N/A

-
-
-

Topic: N/A

-
-
-

Subcategory: Take Actions

Topic: Chronic neurologic disorders: teaching about Levodopa/Carbidopa

- This medication is a dopamine synthesis medication
- Levodopa crosses the blood-brain barrier
- Carbidopa is used to augment levodopa.

Topic: N/A

-
-
-

Topic: N/A

-
-

Main Category: Pharmacological and Parenteral Therapies

Subcategory: Adverse effects/contraindications/side effects/interactions

Topic: adverse effects, interactions, and contraindications: assessing for medication/food interaction

- Take with food when taking Cardiovascular effects from beta1 stimulation
- Take food with taking NSAIDs
- Atropine counteracts the effects of cholinesterase inhibitors

Topic: chronic neurological disorders: adverse effects of carbamazepine

- Rash
- Dizziness
- Headache

Topic: endocrine disorders: potential interactions with levothyroxine

- Increases cardiac responsiveness
- Can increase requirements for insulin and digoxin
- Carbamazepine can increase levothyroxine metabolism

Subcategory: Medication Administration

Topic: Medications affecting blood pressure: client education about captopril

- Change positions slowly
- Inform the clients about a dry cough
- Discontinue the medication if you have a rash that appears.

Topic: Medications affecting coagulation: administering enoxaparin

- Monitor vitals
- Administer in as a subcutaneous injection
- Apply gentle pressure for 1-2 minutes.

Topic: Safe medication administration and error reduction: preparing the right medication

- Antibiotics are an uncontrolled substance
- Controlled substance has a potential for misuse
- Morphine is a schedule 2 drug

Subcategory: Pharmacological pain management

Topic: Safe medication Administration and Error reduction: Administration of controlled substances

- Keep in a safe area.
- Have another nurse witness when discarding the substance.
- Know the schedule of each drug.

Topic: Safe medication administration and error reduction: priority action when administering a controlled substance

- Keep in a safe area.
- Have another nurse witness when discarding the substance.
- Know the schedule of each drug.

Topic:

-
-
-

Main Category: Physiological Adaptation

Subcategory: Fluid and electrolyte imbalances

Topic: Gastrointestinal disorders: identifying medication to administer for severe vomiting

- Ondansetron
- Scopolamine
- Aprepitant
