NOTE: N/A indicates where means and percentile ranks are not presented for sub-scales with fewer than five items.

### Topics To Review

#### Safety and Infection Control (1 item)

##### Reporting of Incident/Event/Irregular Occurrence/Variance (1 item)

Safe Medication Administration and Error Reduction: Situation Requiring Incident Report (Active Learning Template - Medication)

#### Psychosocial Integrity (1 item)

##### Chemical and Other Dependencies/Substance Use Disorder (1 item)

Opioid Agonists and Antagonists: Priority Assessment Following Naloxone Administration (Active Learning Template - Medication)

#### Pharmacological and Parenteral Therapies (20 items)

##### Adverse Effects/Contraindications/Side Effects/Interactions (8 items)

Adverse Effects, Interactions, and Contraindications: Assessing for Medication/Food Interaction (Active Learning Template - Medication)

Adverse Effects, Interactions, and Contraindications: Client Medication Interactions (Active Learning Template - Medication)

Angina and Antilipemic Agents: Medication Contraindicated When Taking Nitroglycerin (Active Learning Template - Medication)

Cardiac Glycosides and Heart Failure: Risk Factors for Digoxin Toxicity (Active Learning Template - Medication)

## Topics To Review

Chronic Neurologic Disorders: Adverse Effects of Carbamazepine (Active Learning Template - Medication)

Chronic Neurologic Disorders: Contraindications of Anticholinergic Medication (Active Learning Template - Medication)

Endocrine Disorders: Potential Interactions With Levothyroxine (Active Learning Template - Medication)

Gastrointestinal Disorders: Monitoring for Adverse Effects of High-Dose Metoclopramide (Active Learning Template - Medication)

### Expected Actions/Outcomes (2 items)

Adverse Effects, Interactions, and Contraindications: Priority Treatment for Anaphylaxis (Active Learning Template - System Disorder)

Airflow Disorders: Evaluating the Effectiveness of Theophylline (Active Learning Template - Medication)

### Medication Administration (8 items)

Medications Affecting Blood Pressure: Titrating Continuous Nitroprusside Infusion (Active Learning Template - Medication)

Medications Affecting Blood Pressure: Client Education About Captopril (Active Learning Template - Medication)

Medications Affecting Coagulation: Administering Enoxaparin (Active Learning Template - Nursing Skill)

Medications Affecting Coagulation: Reviewing Laboratory Tests Before Administering Warfarin (Active Learning Template - Medication)

Medications Affecting Coagulation: Subcutaneous Administration of Heparin (Active Learning Template - Medication)

Medications Affecting Coagulation: Teaching a Client About Self-Administration of Enoxaparin (Active Learning Template - Nursing Skill)

Opioid Agonists and Antagonists: Evaluating Medication Prescriptions (Active Learning Template - Therapeutic Procedure)

Safe Medication Administration and Error Reduction: Preparing the Right Medication (Active Learning Template - Basic Concept)

### Pharmacological Pain Management (2 items)

Safe Medication Administration and Error Reduction: Administration of Controlled Substances (Active Learning Template - Basic Concept)

Safe Medication Administration and Error Reduction: Priority Action When Administering a Controlled Substance (Active Learning Template - Basic Concept)

### Physiological Adaptation (1 item)

#### Fluid and Electrolyte Imbalances (1 item)

Gastrointestinal Disorders: Identifying Medication to Administer for Severe Vomiting (Active Learning Template - Basic Concept)

### Clinical Judgment (3 items)

#### Analyze Cues (1 item)

Medication Affecting Coagulation: Analyzing Cues for a Client Who Is Prescribed Warfarin (Active Learning Template - Medication)

#### Generate Solutions (1 item)

Vitamins and Minerals: Caring for a Client Who Has Iron Deficiency Anemia (Active Learning Template - Medication)

#### Take Actions (1 item)

Chronic Neurologic Disorders: Teaching About Levodopa/Carbidopa (Active Learning Template - Medication)

## Outcomes

| Nursing Process                                    | No of Points | Individual Score | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|----------------------------------------------------|--------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RN Assessment                                      | 17           | 64.7%            | The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care. |
| RN Analysis/Diagnosis                              | 7            | 42.9%            | The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.                                                                                                                   |
| RN Planning                                        | 19           | 47.4%            | The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measurable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals.                                                                                             |
| RN Implementation/Therapeutic Nursing Intervention | 25           | 68.0%            | The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.                                                       |
| RN Evaluation                                      | 7            | 85.7%            | The evaluation step of the nursing process involves the nurse's ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which the client has met the goals and outcomes. During this step the nurse will also assess client/staff understanding of instruction, the effectiveness of interventions, and identify the need for further intervention or the need to alter the plan.                                                                              |

| Priority Setting | No of Points | Individual Score | Description                                                                                                                                                                                                        |
|------------------|--------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                  | 5            | 40.0%            | Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients. |

| Thinking Skills       | No of Points | Individual Score | Description                                                                                                                                                                              |
|-----------------------|--------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Foundational Thinking | 7            | 42.9%            | The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding.                                                            |
| Clinical Application  | 47           | 59.6%            | The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.                                                                       |
| Clinical Judgment     | 21           | 71.4%            | The ability to analyze and interpret elements of a clinical situation to make a decision and respond appropriately. Incorporates Blooms Taxonomy categories of Analyzing and Evaluating. |

| <b>NCLEX®</b>                               | <b>No of Points</b> | <b>Individual Score</b> | <b>Description</b>                                                                                                                                           |
|---------------------------------------------|---------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RN Management of Care                       | 2                   | 100.0%                  | The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients. |
| RN Safety and Infection Control             | 2                   | 50.0%                   | The nurse uses preventive safety measures to promote the health and well-being of clients, significant others, and members of the health care team.          |
| RN Psychosocial Integrity                   | 1                   | 0.0%                    | The nurse directs nursing care to promote and support the emotional, mental and social well-being of clients and significant others.                         |
| RN Pharmacological and Parenteral Therapies | 40                  | 50.0%                   | The nurse administers, monitors and evaluates pharmacological and parenteral therapy.                                                                        |
| RN Reduction of Risk Potential              | 5                   | 100.0%                  | The nurse directs nursing care to decrease clients' risk of developing complications from existing health disorders, treatments or procedures.               |
| RN Physiological Adaptation                 | 4                   | 75.0%                   | The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.                                                  |

|----------------------------------------|--------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Knowledge for Nursing Practice         | 25           | 64.0%            | Integration, translation, and application of established and evolving disciplinary nursing knowledge and ways of knowing, as well as knowledge from other disciplines, including a foundation in liberal arts and natural and social sciences. This distinguishes the practice of professional nursing and forms the basis for clinical judgment and innovation in nursing practice.                                   |
| Person-Centered Care                   | 25           | 64.0%            | Person-centered care focuses on the individual within multiple complicated contexts, including family and/or important others. Person-centered care is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate. Person-centered care builds on a scientific body of knowledge that guides nursing practice regardless of specialty or functional area. |
| Scholarship for the Nursing Discipline | 5            | 40.0%            | The generation, synthesis, translation, application, and dissemination of nursing knowledge to improve health and transform health care.                                                                                                                                                                                                                                                                               |
| Quality and Safety                     | 19           | 63.2%            | Employment of established and emerging principles of safety and improvement science. Quality and safety, as core values of nursing practice, enhance quality and minimize risk of harm to patients and providers through both system effectiveness and individual performance.                                                                                                                                         |
| Professionalism                        | 1            | 0.0%             | Formation and cultivation of a sustainable professional identity, including accountability, perspective, collaborative disposition, and comportment, that reflects nursing's characteristics and values.                                                                                                                                                                                                               |

# Score Explanation and Interpretation

## Individual Performance Profile

### ATI PROFICIENCY LEVELS

| Proficiency Level | Proficiency Level Definition                                                                                                                                                                                                                                                                                                                                                                                                                   | Score Range*    |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Below Level 1     | Scores below the Proficiency Level 1 standard can be considered below minimum expectations and can be indicative of significant risk in this content area. ATI strongly advises these students to develop and complete an intensive plan for focused review and remediation, including the use of ATI materials, textbooks, class notes, reference materials, and assistance from nurse educators.                                             | 0.0% to 53.2%   |
| Level 1           | Scores meeting the Proficiency Level 1 standard can be considered to meet the absolute minimum expectations for performance in this content area. Scores at this level were judged by the content expert panel to indicate a student as likely to just meet NCLEX-RN® standards in this content area. ATI advises these students to develop and complete a rigorous plan of focused review in order to achieve a firmer grasp of this content. | 53.3% to 71.6%  |
| Level 2           | Scores meeting the Proficiency Level 2 standard can be considered to exceed minimum expectations for performance in this content area. Scores at this level were judged by the content expert panel to indicate a student as fairly certain to meet NCLEX-RN standards in this content area. ATI advises these students to engage in continuous focused review in order to improve their knowledge of this content.                            | 71.7% to 86.6%  |
| Level 3           | Scores meeting the Proficiency Level 3 standard can be considered to exceed most expectations for performance in this content area. Scores at this level were judged by the content expert panel to indicate a student as likely to exceed NCLEX-RN standards in this content area. ATI advises these students to engage in continuous focused review to maintain and improve their knowledge of this content.                                 | 86.7% to 100.0% |

\*There are no scoring gaps between the ranges of each level to include all possible scores of the NGN assessment.

### ADJUSTED INDIVIDUAL TOTAL SCORE

To adjust for possible differences in difficulty among the forms of this assessment, the raw score (the total number of points received) is converted to an adjusted raw score through a standard process known as equating. The adjusted individual total score is a function of the adjusted raw score divided by the total number of points possible on the assessment.

$$\frac{\text{Adjusted raw score}}{\text{Total number of points possible}} \times 100$$

The adjusted individual total score is on a scale of 0% to 100% and is incremented in units of 0.1%. For example, if a student received 76 points (raw score) and an adjusted raw score of 75.5810 on a test that has 99 total points possible, then the adjusted individual total score is equal to 76.3%:

$$\frac{75.5810}{99} \times 100 = 76.3\%$$

### ITEM SCORING

ATI follows NCSBN guidance for item scoring. Accordingly, each item is worth one or more points. Depending on the item-specific scoring method, a student's response may earn full, partial, or no points.

### TOTAL NUMBER OF POINTS POSSIBLE

The total number of points possible is the sum of the number of points possible of all scored items and is greater than the total number of scored items on the assessment. The total number of points possible may vary across assessment versions.

### PRETEST ITEMS

There are 10 unscored and 60 scored questions throughout the assessment. The unscored questions are used for research purposes.

### NATIONAL MEAN

This is the average score of all examinees.

### PROGRAM MEAN

This is the average score of all examinees within your specified program type.

### NATIONAL PERCENTILE RANK

This is the percentage of examinees who scored at or below your score.

### PROGRAM PERCENTILE RANK

This is the percentage of examinees within your program type who scored at or below your score.

### TOPICS TO REVIEW

Based on the questions missed on this assessment, a listing of content areas and topics to review is provided. A variety of learning resources can be used in the review process, including content, images, animations and videos in ATI's Content Mastery Series® Review Modules, online practice assessments, and a focused review that is individualized to the questions missed.
