

Clinical Experience Summary- Postpartum

This report will be a minimum of 2 pages in APA format. Each question needs to have a minimum of one paragraph response. In-text citations should be utilized. Use your textbook, the internet, and other scholarly resources to assist with in-text citations.

1. **What is the priority nursing diagnosis for your patient? Why did you choose this diagnosis? (5 points)**
 - a.
2. **Identify 3 nursing interventions supporting the nursing diagnosis? Explain what these interventions are and why they should be completed. (15 points)**
 - a.
3. **What was the evaluation of each of the previously identified nursing interventions? (10 points)**
 - a.
4. **Describe this patient culture and identify a minimum of 2 patient preferences relating to their culture. (10 points)**
 - a. My patient culture was having her baby pre-term and in the NICU.
 - i.
5. **Reflection of clinical experience. (5 points)**
 - a. **What was one thing that put you outside your comfort zone?**
 - i. Most of the things that I was able to do, I had done in the past. Like getting vitals on the mother or baby, giving medications either oral or IV, or communicating with the family. What pushed me out of my comfort zone was when my patient skin started to turn yellow due to her liver enzymes being very elevated due to a fatty liver. I have only seen it in pictures, but being able to see it happen right in front of my eye was crazy. She was very lethargic, loopy, unable to have a bowel movement, however, was still able to understand what was going on. She ended up getting a complete MRI and on an NPO diet.
 - b. **In what way did you see coordination between the health care team to provide appropriate care to the patient?**
 - i. When our patient had the fatty liver and high blood pressure, the nurse was communicating with her doctor about changes that she noticed so that she could be proactive in ordering labs to see what is going on. The nurse informed the doctors that her blood pressure was still elevated, she was a little shorted of breath at rest and was very lethargic. After that, the provider ordered multiple labs to compare and placed her on NPO until they knew more what was going on that was causing the mother to be constipated. During the whole time, we were listening to the mother about her complaints/concerns and wanting to see her baby that was in the NICU, which

she did go to see her daughter for a while. She was so appreciative of us taking the time to listen to her and taking her to see her baby.
