Simulation	
<b>Scenario</b>	In this virtual simulation, you cared for Deion Barnes. The goal was to complete a focused head, neck, and neurological assessment. Review your results below to determine how your performance aligned with the goals of this simulation.
<b>Overall Performance</b>	You met the requirements to complete this virtual health assessment scenario. <b>Score: 94.5%</b>
<b>Essential Actions</b>	<p><b>Required actions - 15 of 16 correctly selected</b></p> <p>Congratulations! You have demonstrated a thorough understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: communicating with the client to elicit additional information, inspecting the head and neck, palpating the head and neck.</p> <p>Spend time reviewing:</p> <ul style="list-style-type: none"> <li>When to sanitize hands when completing client care</li> </ul> <p><b>Interactive actions - 1 of 1 performed correctly</b></p> <p>You demonstrated a thorough understanding of assessment techniques within the focused health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: inspecting the head and neck.</p> <p><b>Expected/unexpected findings - 6 of 6 correctly identified</b></p> <p>You demonstrated a thorough understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: inspecting the head and neck, palpating the head and neck.</p>
<b>Neutral Actions</b>	<p><b>Neutral actions - 0 selected</b></p> <p>Neutral actions do not help or harm the client.</p> <ul style="list-style-type: none"> <li>Only questions specifically related to the focused head, neck, and neurological assessment are necessary.</li> <li>Only steps specifically related to the focused head, neck, and neurological assessment are necessary.</li> </ul>

*This expert chart is intended to assist in evaluating student performance in documentation for this activity. Only the tabs and tables of the chart that warrant entries are included, and the expert responses for comparing against student responses are indicated with bold text.*

Deion Barnes  
**MRN:** 2974785  
**Allergies:** none

**DOB:** 19 years old  
**Height:** 70 in  
**Weight:** 165 lb

**Attending:** John Mack, MD  
**Code Status:** Full code  
**Comments:** none

### Notes

Notes Time	Notes Type	Professional Role
5.0 minutes after start	Nursing/Clinician Note	Nurse

Returned to school after 4 days. Reports problems focusing at school at first, but has been fine for 3 weeks. Returned to running and lifting weights recently, and reports being "totally fine." Drinks an occasional cup of coffee, but denies smoking, or use of alcohol or illicit substances.

### Flowsheet

#### Admission

HH 5.0 Minutes after start

### Informant(s)

Informant if not patient (Name and relationship)

### Family History

Chief Complaint

Principal Problem – Admission Diagnosis

**History of concussion needs to be cleared to return to sports**

Other Problems/Diagnosis

## History of Present Illness/Injury

Location (Where are the Symptoms located?  
Are they local or do they radiate?)

Duration (When did it start? How  
long has this problem existed? Is  
it getting worse? Changing?)

Timing (When does it occur?  
Night or day? At work? etc.)

Quality (Characteristics such as  
constant, sharp, dull, sore)

Severity (How bothersome is the  
problem? Can you sleep, work, etc?)

Describe this illness/injury related to  
how and where this problem began.

What makes this problem worse or better?

Signs and Symptoms

Comments

Sustained concussion 4 weeks ago when playing  
baseball. Had a persistent headache for 3 days.

Did not lose consciousness. States headache was a  
3 to 4 on a 0 to 10 scale for 3 days after injury.

Collided with a teammate; hit the back  
of his head on the ground.

Took over-the-counter medicine for 3 days, which  
"took the edge off." Believes it was acetaminophen.  
Relaxing in a dark room helped the most

Denies nausea, vomiting, dizziness, or change  
in consciousness. Denies neck pain

No headache for last 3 and a half weeks.  
States "I'm feeling a lot better."

## Flowsheet

### Assessment

HH 15.0 Minutes after start

#### Head, Face, Anterior Fontanel, Neck

Head, Face

Anterior Fontanel

Neck

Comment Head is smooth; denies tenderness upon palpation

#### Eyes, Ears, Nose, Throat

Eyes PERRL

Eyes Comments Denies vision changes. Sclerae white.

Ears

Ears Comments

Nose, Throat

Nose, Throat Comments

#### Neurological Group
