Outcomes

Acute/Chronic	No of Points	Individual Score	Description
Acute	2	50.0%	A disease, condition or injury characterized by a relatively sudden onset of symptoms that are usually severe. An episode of acute disease results in: recovery to a state comparable to the client's condition of health and activity before the disease; progression into a chronic illness; or death.
Chronic	2	100.0%	A disease or condition that persists for 6 months or more, or in which a cure is not expected. Chronic diseases generally cannot be prevented by vaccines or cured by medication, nor do they just disappear.
Bloom's Taxonomy	No of Points	Individual Score	Description
Apply	1	100.0%	Use information in a variety of situations.
Understand	3	66.7%	Explain the meaning of information.
Body Function	No of Points	Individual Score	Description
Cognition and Sensation	4	75.0%	The anatomical structures (brain, central and peripheral nervous systems, eyes and ears) and body functions that support perception, interpretation, and response to internal and external stimuli.
BSN Essentials	No of Points	Individual Score	Description
Scholarship for Evidence-Based Practice	5	40.0%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
Clinical Prevention and Population Health	1	100.0%	The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice.
Professionalism and Professional Values	14	100.0%	The need for nurses to be able to practice nursing in a professional manner while providing patient-centered care that is caring, respects diversity, and is governed by legal and ethical tenets.
Baccalaureate Generalist Nursing Practice	2	100.0%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.

Individual Performance Profile

N323 Week 6 TTE

Clinical Areas	No of Points	Individual Score	Description
Mental Health	4	75.0%	Ability to apply nursing knowledge to the care of clients with mental health disorders. Topics include foundational mental health concepts (e.g., therapeutic communication, therapeutic milieu, legal/ethical issues), care of clients experiencing psychobiologic disorders or psychiatric emergencies, and care of clients receiving traditional nonpharmacological and psychopharmacological therapies.

NCLEX RN	No of Points	Individual Score	Description
RN Psychosocial Integrity	4	75.0%	The nurse directs nursing care to promote and support the emotional, mental and social well-being of clients and significant others.

NLN Competency	No of Points	Individual Score	Description
Human Flourishing	2	100.0%	Human flourishing is reflected in patient care that demonstrates respect for diversity, approaches patients in a holistic and patient-centered manner, and uses advocacy to enhance their health and well-being.
Nursing Judgment	18	88.9%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.
Spirit of Inquiry	2	50.0%	A spirit of inquiry is exhibited by nurses who provide evidence based clinical nursing practice and use evidence to promote change and excellence.

Nursing Process	No of Points	Individual Score	Description
RN Assessment	15	80.0%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Planning	1	100.0%	The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measurable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals.
RN Implementation/Therapeutic Nursing Intervention	6	100.0%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.

Individual Performance Profile
N323 Week 6 TTE

QSEN	No of Points	Individual Score	Description
Safety	1	100.0%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Patient-Centered Care	16	100.0%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	5	40.0%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.

Thinking Skills	No of Points	Individual Score	Description
Foundational Thinking	12	91.7%	The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding.
Clinical Application	1	100.0%	The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.
Clinical Judgment	8	75.0%	The ability to analyze and interpret elements of a clinical situation to make a decision and respond appropriately. Incorporates Blooms Taxonomy categories of Analyzing and Evaluating.

Topics To Review

N323 Week 6 TTE (2 items)

- Anxiety Disorders: Recognizing PTSD Symptoms
- Identifying Manifestations of Somatic Symptom Disorder in a Client Who Attends an Outpatient Clinic for Care
