

Polypharmacy Project

Taylor Lowe, BSN Student, Kacey Sands, BSN Student

N322 Introduction to Pharmacology

Lakeview College of Nursing

Pamela Armstrong AP-C, MSN, RN

Date Due

Polypharmacy Case

Background: Karen is a 40-year-old female that presents to the emergency department with complaints of severe abdominal pain with an onset of seven days ago. Karen states that the pain has gradually increased over the past week and is now currently rating the pain at 10/10. She states that she started taking her ibuprofen to assist in alleviating the pain, but it is no longer helping at all. She states that when her pain started getting worse, she started developing nausea and vomited two times this morning. Her emesis was dark and blood tinged. Her most recent bowel movements have been dark, almost black, she states. Other significant assessments include abdominal tenderness and reports of increased symptoms of GERD over the last month. Karen had a pituitary tumor surgical excision one month ago and has an extensive past medical history.

Economics: Karen is self-employed as an attorney and has her own office. Her annual income is greater than \$100,000 per year.

Insurance: Karen purchases her own medical insurance, which costs \$2000 per month. It covers 75% of medication costs.

Allergies: NSAIDS

Diet: No added salt and low concentration sweets.

Medical Diagnosis: Cushing's, gastroesophageal reflux disease, recurrent constipation, hypertension, depression, type 2 diabetes mellitus.

Current medications include the following:

POLYPHARMACY

3

Hydrocortisone 15 mg every am and 5 mg in the afternoon

Metoprolol tartrate 25 mg by mouth twice a day

Spironolactone-hydrochlorothiazide 50 mg/50 mg take one tablet by mouth daily

Prozac 20 mg by mouth twice a day

Saxagliptin 5 mg once daily by mouth

Atorvastatin 10 mg by mouth daily

Tresiba 20 units SC daily

Miralax 17 grams by mouth daily

Bismuth subsalicylate 525 mg (30 mL) by mouth every six hours PRN

Ibuprofen 400 mg by mouth every six hours PRN

Drug #1	Drug Name (Generic): Hydrocortisone Drug Name (Trade): Alkindi Sprinkle, Cortef, Cortenema (Jones and Bartlett Learning, 2024, pg. 664) Drug Class: (Jones and Bartlett Learning, 2024, pg. 664) Pharmacological: Glucocorticoid Therapeutic: Adrenocorticoid replacement, anti-inflammatory
How is the medication taken: (include dose, route, and frequency)	
Specific Directions not included above:	
Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	

<p>What is the indication for use of this medication based on the client’s past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)</p>	
<p>What would you teach the client about taking this medication? You must prioritize 2 (see rubric)</p>	<p>1. 2.</p>
<p>How much would medication cost per month if paying out of pocket?</p>	

<p>Drug #2</p>	<p>Drug Name (Generic): Metoprolol tartrate</p> <p>Drug Name (Trade): Lopresor (CAN), Lopresor SR (CAN), Lopressor (Jones and Bartlett Learning, 2024, pg. 882)</p> <p>Drug Class: (Jones and Bartlett Learning, 2024, pg. 882)</p> <p>Pharmacological: Beta- adrenergic blocker</p> <p>Therapeutic: Antianginal, antihypertensive</p>
-----------------------	---

How is the medication taken: (include dose, route, and frequency)	This medication is 25mg taken orally 2 times a day.
Specific Directions not included above:	
Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	
What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)	
What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	<ol style="list-style-type: none"> 1. 2.

How much would medication cost per month if paying out of pocket?	Without insurance, this medication would cost \$7.60 per month (Goodrx.com)
Drug #3	Drug Name (Generic): spironolactone-hydrochlorothiazide Drug Name (Trade): Aldactone, CaroSpir (Jones and Bartlett Learning, 2024, pg. 1263) Drug Class: (Jones and Bartlett Learning, 2024, pg. 1263) Pharmacological: Potassium-sparing diuretic Therapeutic: Diuretic
How is the medication taken: (include dose, route, and frequency)	This medication is 50mg of spironolactone and 50 mg of hydrochlorothiazide taken orally once daily.
Specific Directions not included above:	
Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	

<p>What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)</p>	
<p>What would you teach the client about taking this medication? You must prioritize 2 (see rubric)</p>	<ol style="list-style-type: none"> 1. 2.
<p>How much would medication cost per month if paying out of pocket?</p>	<p>Without insurance, this medication would cost 45.60 per month (Goodrx.com).</p>
<p>Drug #4</p>	<p>Drug Name (Generic): fluoxetine hydrochloride (Jones and Bartlett Learning, 2024, pg. 580)</p> <p>Drug Name (Trade): Prozac</p> <p>Drug Class: (Jones and Bartlett Learning, 2024, pg. 580)</p> <p>Pharmacological: Selective serotonin reuptake inhibitor (SSRI)</p> <p>Therapeutic: Antidepressant</p>
<p>How is the medication taken: (include dose, route, and frequency)</p>	<p>This medication is 20mg taken orally two times a day.</p>
<p>Specific Directions not included above:</p>	

Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	
What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)	
What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	<ol style="list-style-type: none"> 1. 2.
How much would medication cost per month if paying out of pocket?	Without insurance, this medication would cost 464.93 per month (Goodrx.com).
Drug # 5	Drug Name (Generic): Saxagliptin

	<p>Drug Name (Trade): Onglyza (Jones and Bartlett Learning, 2024, pg. 1221)</p> <p>Drug Class:</p> <p>Pharmacological: Dipeptidyl peptidase-4 (DPP-4) inhibitor</p> <p>Therapeutic: Antidiabetic</p>
<p>How is the medication taken: (include dose, route, and frequency)</p>	<p>This medication is 5mg taken orally one time daily.</p>
<p>Specific Directions not included above:</p>	
<p>Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)</p>	
<p>Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)</p>	
<p>Does any of the client's past medical history contradict the use of this medication?</p>	
<p>What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical</p>	

history, please list potential indications for use of the medication in general)	
What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	<ol style="list-style-type: none"> 1. 2.
How much would medication cost per month if paying out of pocket?	Without insurance, this medication would cost 171.47 per month (Goodrx.com).
Drug # 6	<p>Drug Name (Generic): atorvastatin calcium (Jones and Bartlett Learning, 2024, pg. 121)</p> <p>Drug Name (Trade): Lipitor (Jones and Bartlett Learning, 2024, pg. 121)</p> <p>Drug Class: (Jones and Bartlett Learning, 2024, pg. 121)</p> <ul style="list-style-type: none"> • Pharmacologic class: HMG-CoA reductase inhibitor • Therapeutic class: Antihyperlipidemic
How is the medication taken: (include dose, route, and frequency)	This medication is taken by mouth. She takes 10 milligrams by mouth daily.
Specific Directions not included above:	While this medication can lower lipid levels, it is not a cure. Diet, exercise, and drinking lots of water need to be part of the patient’s everyday lifestyle. It is also important to note that this medication can be taken whenever the patient desires; however, it needs to be taken at the same time every day (Jones and Bartlett Learning, 2024, pg. 123).

Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	This medication does not react with any of her other personal medications.
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	
What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)	
What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	<ol style="list-style-type: none"> 1. 2.
How much would medication cost per month if paying out of pocket?	According to GoodRx, this medication with no insurance coverage, on average, can cost \$63.90 (GoodRx).
Drug # 7	Drug Name (Generic): insulin degludec (Drugs.com)

	Drug Name (Trade): Tresiba Drug Class: Insulin (Drugs.com)
How is the medication taken: (include dose, route, and frequency)	She takes 20 units subcutaneously daily.
Specific Directions not included above:	
Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	This medication may interact with saxagliptin, which also helps with controlling blood sugar (Drugs.com). This medication may interact with hydrocortisone because that medication may reduce the effectiveness of this insulin (Drugs.com). This drug may interact with bismuth subsalicylate, which can lower blood sugar (Drugs.com).
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	
What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical	Since this patient has type II diabetes, she takes this medication to help control her blood sugar to the appropriate level.

history, please list potential indications for use of the medication in general)	
What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	<ol style="list-style-type: none"> 1. 2.
How much would medication cost per month if paying out of pocket?	Without insurance, this medication costs \$238.92 (GoodRx.com)
Drug # 8	Drug Name (Generic): polyethylene glycol 3350 (Drugs.com) Drug Name (Trade): Miralax Drug Class: Laxatives (Drugs.com)
How is the medication taken: (include dose, route, and frequency)	She takes 17 grams of Miralax by mouth daily.
Specific Directions not included above:	
Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	This medication does interact with hydrocortisone. Because both medications have a laxative effect, chronic use of both increases the risk of dehydration and hypokalemia (Drugs.com).
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	

Does any of the client's past medical history contradict the use of this medication?	
What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)	She has recurrent constipation listed in her medical history. She uses Miralax often to help with that particular problem.
What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	<ol style="list-style-type: none"> 1. 2.
How much would medication cost per month if paying out of pocket?	Without insurance, this product averages \$27.11 (GoodRx.com).
Drug # 9	Drug Name (Generic): bismuth subsalicylate Drug Name (Trade): Pepto Bismol (Drugs.com) Drug Class: antidiarrheals (Drugs.com)
How is the medication taken: (include dose, route, and frequency)	She takes 525 mg (30 mL) by mouth every six hours as needed.
Specific Directions not included above:	

Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	This medication can interact with insulin degludec because they both can lower the blood sugar (Drugs.com).
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	
What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)	The client is taking this medication because it relieves symptoms of diarrhea, heartburn, indigestion, and upset stomach. Due to gastroesophageal reflux disease and the fact that she is experiencing a sudden increase in symptoms from the past month, she is taking this medication in hopes to control her symptoms (Drugs.com).
What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	<ol style="list-style-type: none"> 1. 2.
How much would medication cost per month if paying out of pocket?	Without insurance, this medication averages \$19.05 (GoodRx.com).
Drug # 10	Drug Name (Generic): ibuprofen

	Drug Name (Trade): Advil Drug Class: Nonsteroidal anti-inflammatory drugs (Drugs.com)
How is the medication taken: (include dose, route, and frequency)	She takes 400 mg by mouth every six hours as needed.
Specific Directions not included above:	
Does this medication interact with any other medication(s) on this list? (see rubric for further instruction)	This medication interacts with hydrocortisone. These medications increase the risk for gastrointestinal tract side effects such as inflammation or bleeding (Drugs.com).
Lifestyle interactions: (Daily tobacco use, alcohol, drugs, etc.)	
Does any of the client's past medical history contradict the use of this medication?	According to her current allergies list, it says she is allergic to NSAIDS, in which ibuprofen is classified under this. She should not be taking ibuprofen if she allergic to it.
What is the indication for use of this medication based on the client's past medical history? (If unable to determine an indication based on past medical history, please list potential indications for use of the medication in general)	She has been taking this medication for the past week because of her severe abdominal pain she has been experiencing. However, she says that the medication is no longer helping to ease her pain.

What would you teach the client about taking this medication? You must prioritize 2 (see rubric)	1. 2.
How much would medication cost per month if paying out of pocket?	Without insurance, this medication costs about \$15.04 (GoodRx.com).

Is there anything about this medication regimen scenario that might indicate a potential difficulty in maintaining compliance with the orders as listed?

Is there anything about this medication regimen scenario that might assist the client in maintaining the medication regimen as ordered?

What suggestions might you make to the prescriber and/or client (or questions you might ask the prescriber) to help this client scenario? (think about decreasing the potential for interaction(s) through medication reduction, other potential medications, diet changes, lifestyle changes, etc)

What would the patients monthly out of pocket expense for all 10 medications? (Total Cost for all 10 meds)?
