

# Module Report

Simulation: Skills Modules 3.0

Module: Virtual Scenario: HIPAA

Individual Name: **Lillian Ljubojevic**

Institution: **Lakeview CON**

Program Type: **BSN**

| Time Use And Score      |           |        |
|-------------------------|-----------|--------|
|                         | Date      | Time   |
| Virtual Scenario: HIPAA | 2/26/2025 | 17 min |

| Simulation                  |   |
|-----------------------------|---|
| <b>Scenario</b>             | In this virtual simulation, you interacted with other healthcare professionals at the nursing station of an acute care facility. The goal was to use clinical judgement to maintain client privacy and confidentiality through various methods of communication in accordance with the Health Insurance Portability and Accountability Act (HIPAA) regulations. Review your results below to determine how your performance aligned with the goals of the simulation. |
| <b>Overall Performance</b>  | Congratulations! You met the requirements to complete this virtual skills scenario. <b>Score: 84.6%</b>   |
| <b>Essential Activities</b> | <b>Implementing Security Safeguards</b><br>You did not demonstrate a thorough understanding of HIPAA regulations and security safeguards needed to complete this virtual skills scenario.   |
|                             | <b>Sharing Protected Health Information</b><br>Congratulations! You have demonstrated a thorough understanding in your responses to maintain client confidentiality when sharing protected health information.  |

**Pitfall Actions****Implementing Security Safeguards**

*Major* - You selected one or more actions that demonstrated an increased risk of negative outcome for the client when implementing security safeguard to protect client privacy and maintain client confidentiality. Therefore, further study of implementing security safeguards when using various methods to communicate with others should be reviewed prior to completing the scenario again. Spend time reviewing guidelines for security of electronic health records, promoting privacy during verbal discussion of client care, use of whiteboards, communicating with media, leaving voice messages, using a fax machine to share client information, and proper disposal of protected health information.
