

Individual Performance Profile

RN Safety: Pharmacology Across the Lifespan 3.0 Case Study Test

Individual Name: **SHELBY POWELL**
Student Number: **8275678**
Institution: **Lakeview CON**
Program Type: **BSN**
Test Date: **2/26/2025**

Individual Score: **100.0%**
Practice Time: **1 min**

Individual Performance in the Major Content Areas

Sub-Scale	# Items	# Points	Individual Score	Individual Score (% Correct)										
				1	10	20	30	40	50	60	70	80	90	100
Collaboration/Teamwork	1	1	100.0%											▲
Intracranial Regulation/Neural Regulation	1	1	100.0%											▲
Perfusion	1	1	100.0%											▲
Safety	2	2	100.0%											▲

Topics To Review

Outcomes

Nursing Process	No of Points	Individual Score	Description
RN Analysis/Diagnosis	2	100.0%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Implementation/Therapeutic Nursing Intervention	3	100.0%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.

Thinking Skills	No of Points	Individual Score	Description
Clinical Application	5	100.0%	The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.

NCLEX®	No of Points	Individual Score	Description
RN Pharmacological and Parenteral Therapies	5	100.0%	The nurse administers, monitors and evaluates pharmacological and parenteral therapy.

Clinical Areas	No of Points	Individual Score	Description
Pharmacology	5	100.0%	Ability to apply concepts related to the pharmacodynamics and pharmacotherapeutics of commonly prescribed medications for clients with physical and mental health disorders. Topics include principles of medication administration and dosage calculation, side/adverse effects, drug/food interactions, contraindications, and nursing implications integral to the safe administration of medications to clients across the lifespan.

QSEN	No of Points	Individual Score	Description
Safety	1	100.0%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Evidence Based Practice	4	100.0%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.

NLN Competency	No of Points	Individual Score	Description
Nursing Judgment	5	100.0%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.

BSN Essentials	No of Points	Individual Score	Description
Scholarship for Evidence-Based Practice	4	100.0%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
Clinical Prevention and Population Health	1	100.0%	The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice.

AACN Essentials	No of Points	Individual Score	Description
Knowledge for Nursing Practice	3	100.0%	Integration, translation, and application of established and evolving disciplinary nursing knowledge and ways of knowing, as well as knowledge from other disciplines, including a foundation in liberal arts and natural and social sciences. This distinguishes the practice of professional nursing and forms the basis for clinical judgment and innovation in nursing practice.
Person-Centered Care	1	100.0%	Person-centered care focuses on the individual within multiple complicated contexts, including family and/or important others. Person-centered care is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate. Person-centered care builds on a scientific body of knowledge that guides nursing practice regardless of specialty or functional area.
Interprofessional Partnerships	1	100.0%	Intentional collaboration across professions and with care team members, patients, families, communities, and other stakeholders to optimize care, enhance the healthcare experience, and strengthen outcomes.
