Topics To Review

Antepartum Nursing Care (2 items)

Normal Physiological Changes During Pregnancy: Identifying Expected Findings

Nutrition During Pregnancy: Lactose-Free Sources of Calcium

Basic Care and Comfort (2 items)

Sensory Perception: Troubleshooting a Hearing Aid

Nasogastric Intubation and Enteral Feedings: Preventing Aspiration With a Gastrostomy Tube

Basic Concepts (1 item)

Client Safety: Bomb Threat Evacuation

Community Health Care (1 item)

Rest and Sleep: Contributing Factors of Insomnia

Expected Changes (1 item)

Individual Considerations of Medication Administration: Effects of Aging

Intrapartum Nursing Care (1 item)

Fetal Assessment During Labor: Prioritizing the Care of Multiple Clients

Managing Client Care (1 item)

Coordinating Client Care: Implementing Change

Medical-Surgical: Cardiovascular and Hematology (1 item)

Topics To Review

Fluid and Electrolyte Imbalances: Laboratory Findings With Hypovolemic Shock

Medical-Surgical: Dermatological (1 item)

Cancer Disorders: Identifying Potentially Malignant Skin Lesions

Medical-Surgical: Endocrine (1 item)

Hyperthyroidism: Teaching About Management

Medical-Surgical: Gastrointestinal (1 item)

Critical Thinking and Clinical Judgment: Prioritizing Care for Multiple Clients

Medical-Surgical: Neurosensory (1 item)

Neurologic Diagnostic Procedures: Preparing for an Electroencephalogram

Medical-Surgical: Renal and Urinary (1 item)

Hemodialysis and Peritoneal Dialysis: Manifestations of Dialysis Disequilibrium Syndrome

Medical-Surgical: Respiratory (1 item)

Tuberculosis: Interpreting the Results of a Mantoux Test

Medications Affecting the Cardiovascular and Hematological Systems (2 items)

Blood and Blood Product Transfusions: Indications of a Transfusion Reaction

Vitamins, Minerals, and Supplements: Interaction With an Anticoagulant

Medications Affecting the Endocrine System (2 items)

Diabetes Mellitus: Teaching Self-Administration of Insulin

Endocrine Disorders: Indications of Thyrotoxicosis Due to Levothyroxine

Medications for Pain and Inflammation (1 item)

Amputations: Managing Phantom Limb Pain

Nursing Care of Children With Acute Illness (2 items)

Acute Infectious Gastrointestinal Disorders: Priority Assessment for Dehydration

Fractures: Teaching Cast Care

Nursing Care of Children With Chronic Disorders (2 items)

Diabetes Mellitus: Laboratory Results to Report

Asthma: Teaching About Inhaled Glucocorticoids

Perspectives of Nursing Care of Children (3 items)

Health Promotion of Infants (1 Month to 1 Year): Estimating Age by Developmental Abilities

HIV/AIDS: Planning Care for an Infant Who Has a Positive Enzyme-Linked Immunosorbent Assay Test

Hospitalization, Illness, and Play: Planning Therapeutic Play for a Preschooler

Psychobiological Disorders (2 items)

Effective Communication: Responding to Concerns About Hospitalization

Creating and Maintaining a Therapeutic and Safe Environment: Promoting a Therapeutic Environment for a Client Who Has Depression

Safe and Effective Care Environment (1 item)

Infection Control: Precautions for Multidrug-Resistant Infections

Special Considerations of Nursing Care of Children (1 item)

Acute and Infectious Respiratory Illnesses: Indications of Impending Airway Obstruction

Outcomes

Nursing Process	No of Points	Individual Score	Description
Assessment (RN 2013)	20	70.0%	Ability to apply nursing knowledge to the systematic collection of data about the client's present health status in order to identify the client's needs and to identify appropriate assessments to be performed based on client findings. Also includes the ability to accurately collect client data throughout the assessment process (client history, client interview, vital sign and hemodynamic measurements, physical assessments) and to appropriately recognize the need for assessment prior to intervention.
Analysis/Diagnosis (RN 2013)	33	72.7%	Ability to analyze collected data and to reach an appropriate nursing judgment about the client's health status and coping mechanisms, specifically recognizing data indicating a health problem/risk and identifying the client's needs for health intervention. Also includes the ability to formulate appropriate nursing diagnoses/collaborative problems based on identified client needs.
Planning (RN 2013)	20	80.0%	Ability to apply nursing knowledge to the development of an appropriate plan of care for clients with specific health alterations or needs for health promotion/maintenance. Includes the ability to establish priorities of care, effectively delegate client care, and set appropriate client goals/outcomes in order to ensure clients' needs are met.
Implementation/Therapeutic Nursing Intervention (RN 2013)	62	79.0%	Ability to select/implement appropriate interventions (e.g., technical skill, client education, communication response) based on nursing knowledge, priorities of care, and planned goals/outcomes in order to promote, maintain, or restore a client's health. Also includes the ability to appropriately respond to an unplanned event (e.g., observation of unsafe practice, change in client status) or life-threatening situation and to routinely take measures to minimize a client's risk.
Evaluation (RN 2013)	15	100.0%	Ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which goals and outcomes have been met. Also includes the ability to assess client/staff understanding of instruction, the effectiveness of intervention, and the recognition of a need for further intervention.

Priority Setting	No of Points	Individual Score	Description
	26	84.6%	Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients.

Thinking Skills	No of Points	Individual Score	Description
Foundational Thinking	15	73.3%	The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding.
Clinical Application	135	79.3%	The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.

NCLEX®	No of Points	Individual Score	Description
Management of Care RN 2013	16	81.3%	Providing integrated, cost-effective care to clients by coordinating, supervising, and/or collaborating with members of the multi-disciplinary health care team.
Safety and Infection Control RN 2013	12	75.0%	Incorporating preventative safety measures in the provision of client care that provides for the health and well-being of clients, significant others, and members of the health care team.
Health Promotion and Maintenance RN 2013	21	81.0%	Providing and directing nursing care that encourages prevention and early detection of illness, as well as the promotion of health.
Psychosocial Integrity RN 2013	19	89.5%	Promoting mental, emotional, and social well-being of clients and significant others through the provision of nursing care.
Basic Care and Comfort RN 2013	9	55.6%	Promoting comfort while helping clients perform activities of daily living.
Pharmacological and Parenteral Therapies RN 2013	27	81.5%	Administering medications to clients, including parenteral therapy, while monitoring and evaluating their responses.
Reduction of Risk Potential RN 2013	24	79.2%	Providing nursing care that decreases the risk of clients developing health-related complications.
Physiological Adaptation RN 2013	22	72.7%	Providing and directing nursing care for clients experiencing physical illness.

Clinical Areas	No of Points	Individual Score	Description
Fundamentals	25	76.0%	Ability to apply fundamental nursing principles and skills to basic needs of clients. Topics include foundational client care concepts (ie: medical and surgical asepsis, infection control, physical assessment, therapeutic communication, medication administration, pain management integral to the delivery of safe, ethical, and legal nursing practice.
Adult Medical-Surgical	42	83.3%	Ability to apply medical-surgical nursing knowledge to clinical problems experienced by adults. Topics include care of clients with cardiovascular, hematologic, gastrointestinal, neurosensory, endocrine, fluid and electrolyte, integumentary, lymph/immune/infectious, renal and urinary, musculoskeletal, reproductive, and respiratory disorders as well as topics relevant to perioperative nursing care and emergency care/triage.
Maternal Newborn	12	75.0%	Ability to apply nursing knowledge to perinatal nursing care. Topics include antepartum, intrapartum, and postpartum nursing care as well as care of the newborn.
Mental Health	15	86.7%	Ability to apply nursing knowledge to the care of clients with mental health disorders. Topics include foundational mental health concepts (e.g., therapeutic communication, therapeutic milieu, legal/ethical issues), care of clients experiencing psychobiologic disorders or psychiatric emergencies, and care of clients receiving traditional nonpharmacological and psychopharmacological therapies.
Pediatric Nursing	24	66.7%	Ability to apply nursing knowledge to clinical problems experienced by children. Topics include basic concepts (e.g., medication administration, physical assessment, nutritional needs), care of children with various system disorders, care of children experiencing pediatric emergencies (e.g., accidental poisoning, respiratory arrest), and care of children with psychosocial disorders.
Leadership	8	87.5%	Ability to manage the care of a caseload of clients and nursing care team while using principles of management and supervision. Topics include leadership skills (ie: interdisciplinary collaboration, advocacy, prioritization, delegation), performance improvement, continuity of client care, and principles of case management while ensuring safe client care and efficient utilization of human and material resources.
Pharmacology	22	77.3%	Ability to apply concepts related to the pharmacodynamics and pharmacotherapeutics of commonly prescribed medications for clients with physical and mental health disorders. Topics include principles of medication administration and dosage calculation, side/adverse effects, drug/food interactions, contraindications, and nursing implications integral to the safe administration of medications to clients across the lifespan.
Nutrition	1	100.0%	Ability to apply nursing knowledge to normal nutrition and diet therapy. Topics include the collection of data regarding nutritional status; implementation of actions to promote normal nutrition or dietary modification in response to illness; and evaluation of the client's response to diet therapy.

QSEN	No of Points	Individual Score	Description
Safety	45	84.4%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Patient-Centered Care	41	70.7%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	53	79.2%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.
Informatics	1	100.0%	The use of information technology as a communication and information gathering tool that supports clinical decision making and safe, scientifically based nursing practice.
Quality Improvement	1	100.0%	Care-related and organizational processes that involve the development and implementation of a plan to improve health care services and better meet the needs of clients.
Teamwork and Collaboration	9	77.8%	The delivery of client care in partnership with multidisciplinary members of the health care team, to achieve continuity of care and positive client outcomes.
