

Summary of Legacy Project for Portfolio

I participated in the Legacy Project as part of the group in the N442 course, Spring 2025. The group volunteered in Dwelling Place for homeless people in Danville, Illinois. Also, the group researched problems related to homelessness and the involvement of nurses in improving the health of homeless people. The students' work helped with everyday activities in this place. The dwelling place provides help for people in need Monday to Friday. The help is in the form of food, meals, and clothes. Also, there are other donations from the stores, like nonperishable foods, over-the-counter medications for pain and temperature, and hand and foot warmers to prevent frostbites.

Volunteers do all the work in this place. The visitors can have showers and wash their clothes in the dwelling place. The students were receiving donations, sorting them for visitors to take what they needed.

We inventory food items and prepare packages for people to take with them.
