

Individual Performance Profile

N323 Week 12 TTE

Outcomes

| Acute/Chronic | No of Points | Individual Score | Description |
|---------------|--------------|------------------|--|
| Acute | 7 | 100.0% | A disease, condition or injury characterized by a relatively sudden onset of symptoms that are usually severe. An episode of acute disease results in: recovery to a state comparable to the client's condition of health and activity before the disease; progression into a chronic illness; or death. |
| Chronic | 8 | 100.0% | A disease or condition that persists for 6 months or more, or in which a cure is not expected. Chronic diseases generally cannot be prevented by vaccines or cured by medication, nor do they just disappear. |

| Bloom's Taxonomy | No of Points | Individual Score | Description |
|------------------|--------------|------------------|---|
| Analyze | 1 | 100.0% | Examine detailed information methodically to determine relationships. |
| Apply | 8 | 100.0% | Use information in a variety of situations. |
| Understand | 6 | 100.0% | Explain the meaning of information. |

| Body Function | No of Points | Individual Score | Description |
|-------------------------|--------------|------------------|---|
| Cognition and Sensation | 11 | 100.0% | The anatomical structures (brain, central and peripheral nervous systems, eyes and ears) and body functions that support perception, interpretation, and response to internal and external stimuli. |

Individual Performance Profile

N323 Week 12 TTE

| BSN Essentials | No of Points | Individual Score | Description |
|---|--------------|------------------|--|
| Liberal Education for Baccalaureate Generalist Nursing Practice | 7 | 100.0% | The need for an education that exposes nurses to multiple fields of study providing the foundation for a global perspective of society as well as high level thinking and acquisition of skills that can be applied to complex patient and system-based problems. |
| Scholarship for Evidence-Based Practice | 15 | 100.0% | The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes. |
| Information Management and Application of Patient Care Technology | 1 | 100.0% | The need for nurses to be able to use computer-based information management systems and patient care technology in the provision of client care. |
| Clinical Prevention and Population Health | 2 | 100.0% | The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice. |
| Professionalism and Professional Values | 1 | 100.0% | The need for nurses to be able to practice nursing in a professional manner while providing patient-centered care that is caring, respects diversity, and is governed by legal and ethical tenets. |
| Baccalaureate Generalist Nursing Practice | 21 | 100.0% | The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations. |

| Clinical Areas | No of Points | Individual Score | Description |
|-------------------|--------------|------------------|---|
| Mental Health | 12 | 100.0% | Ability to apply nursing knowledge to the care of clients with mental health disorders. Topics include foundational mental health concepts (e.g., therapeutic communication, therapeutic milieu, legal/ethical issues), care of clients experiencing psychobiologic disorders or psychiatric emergencies, and care of clients receiving traditional nonpharmacological and psychopharmacological therapies. |
| Pediatric Nursing | 1 | 100.0% | Ability to apply nursing knowledge to clinical problems experienced by children. Topics include basic concepts (e.g., medication administration, physical assessment, nutritional needs), care of children with various system disorders, care of children experiencing pediatric emergencies (e.g., accidental poisoning, respiratory arrest), and care of children with psychosocial disorders. |

| Clinical Judgment | No of Points | Individual Score | Description |
|-------------------|--------------|------------------|--|
| Analyze Cues | 7 | 100.0% | Link recognized cues to a client's clinical presentation and establishing probable client needs, concerns, or problems. Compare client findings to evidence-based resources and standards of care. Analyze expected and unexpected findings in health data. Anticipate illness/injury and wellness progression. Identify client problems and related health alterations. Analyze client needs. Identify potential complications. Identify how pathophysiology relates to clinical presentation. Identify data that is of immediate concern. |

Individual Performance Profile

N323 Week 12 TTE

| NCLEX RN | No of Points | Individual Score | Description |
|---|--------------|------------------|--|
| RN Psychosocial Integrity | 12 | 100.0% | The nurse directs nursing care to promote and support the emotional, mental and social well-being of clients and significant others. |
| RN Pharmacological and Parenteral Therapies | 2 | 100.0% | The nurse administers, monitors and evaluates pharmacological and parenteral therapy. |
| RN Physiological Adaptation | 1 | 100.0% | The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness. |

| NLN Competency | No of Points | Individual Score | Description |
|-----------------------|--------------|------------------|---|
| Human Flourishing | 15 | 100.0% | Human flourishing is reflected in patient care that demonstrates respect for diversity, approaches patients in a holistic and patient-centered manner, and uses advocacy to enhance their health and well-being. |
| Nursing Judgment | 31 | 100.0% | Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care. |
| Professional Identity | 1 | 100.0% | Professional identity reflects the professional development of the nurse as a member and leader of the health care team who promotes relationship-centered care, and whose practice reflects integrity and caring while following ethical and legal guidelines. |
| Spirit of Inquiry | 1 | 100.0% | A spirit of inquiry is exhibited by nurses who provide evidence based clinical nursing practice and use evidence to promote change and excellence. |

Individual Performance Profile

N323 Week 12 TTE

| Nursing Process | No of Points | Individual Score | Description |
|--|--------------|------------------|---|
| RN Assessment | 10 | 100.0% | The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care. |
| RN Analysis/Diagnosis | 21 | 100.0% | The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care. |
| RN Planning | 2 | 100.0% | The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measurable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals. |
| RN Implementation/Therapeutic Nursing Intervention | 15 | 100.0% | The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response. |

| QSEN | No of Points | Individual Score | Description |
|-------------------------|--------------|------------------|---|
| Patient-Centered Care | 18 | 100.0% | The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values. |
| Evidence Based Practice | 30 | 100.0% | The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care. |

| Thinking Skills | No of Points | Individual Score | Description |
|-----------------------|--------------|------------------|--|
| Foundational Thinking | 7 | 100.0% | The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding. |
| Clinical Application | 9 | 100.0% | The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying. |
| Clinical Judgment | 32 | 100.0% | The ability to analyze and interpret elements of a clinical situation to make a decision and respond appropriately. Incorporates Blooms Taxonomy categories of Analyzing and Evaluating. |
