

Remediation

1. Communication

- a. Why it is essential for nursing practice?
 - i. Vital for safe, effective care and building trust with patients and teams.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Practice clear, respectful, and therapeutic communication during clinical and simulations.

2. Factors that Affect Communication with Individuals and Groups

- a. Why it is essential for nursing practice?
 - i. Culture, emotions, language, and environment can impact understanding and care quality.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Learn cultural competence, active listening, and how to adapt communication styles.

3. Organizational Communication

- a. Why it is essential for nursing practice?
 - i. Supports teamwork, and efficiency, and reduces errors in complex healthcare settings.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Understand the chain of command, use SBAR and participate in team meetings during clinical.

4. Client Education

- a. Why it is essential for nursing practice?
 - i. Helps patients understand conditions, treatments, and how to care for themselves.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Use simple language, visuals, and the teach-back method to reinforce learning.

5. Evidence-Based Practice

- a. Why it is essential for nursing practice?
 - i. Ensures care is based on the best current research, improving patient outcomes.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Learn how to read research articles, ask clinical questions, and apply findings to care.

6. Quality Improvement

- a. Why it is essential for nursing practice?
 - i. Identifies ways to make care safer, more efficient, and effective.
- b. What can you do to improve that topic as you move through nursing school?

- i. Participate in QI projects, understand root cause analysis, and track outcomes.

7. Priority Setting

- a. Why it is essential for nursing practice?
 - i. Ensures the most critical patient needs are met first, especially in emergencies.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Practice using Maslow's hierarchy, ABCs (Airway, Breathing, Circulation), and clinical judgment tools.

8. Adult Medical-Surgical

- a. Why it is essential for nursing practice?
 - i. Covers common and complex adult health conditions; foundational to nursing practice.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Focus on understanding pathophysiology, medications, and nursing interventions in clinical rotations.

9. Patient-Centered Care

- a. Why it is essential for nursing practice?
 - i. Respects patient preferences, needs, and values in all decisions.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Involve patients in care planning and decision-making, practice empathy and individualized care.

10. Informatics

- a. Why it is essential for nursing practice?
 - i. Enhances accuracy in documentation, decision-making, and communication.
- b. What can you do to improve that topic as you move through nursing school?
 - i. Gain proficiency in electronic health records, data security, and the use of clinical tools like barcode scanning.
