

N443 Leadership and Management
Proctored ATI Remediation Template

Student Name: Natalie Zizumbo
Assessment Name: **RN Leadership 2023**
Semester: Spring 2025

Main Category: Management of Care
Subcategory: Advance Directives/Self-Determination/Life Planning
Topic: Professional Practice: Evaluating Teaching About Advance Directives <ul style="list-style-type: none">• An advance directive is used to communicate the client's wishes if they are unable to do so.• All clients admitted to a facility must be asked if they have an advanced directive and be provided with information if they do not.• Advance Directives have two parts: a living will and a durable power of attorney. Topic: Professional Practice: Teaching About Living Wills <ul style="list-style-type: none">• A living will is a legal document that contains the client's wishes for their medical treatment if they are unable to make decisions anymore.• A living will can usually include treatments that prolong life.• A living will should be followed regardless of families wishes.
Subcategory: Assignment, Delegation and Supervision
Topic: Leading and Managing Client Care: Using Time Appropriately <ul style="list-style-type: none">• To use their time appropriately, the nurse should organize the client care based on their immediate needs and prioritize those tasks.• The nurse should delegate other tasks to LPNs or APs.• The nurse should document interventions after they are immediately done instead of waiting until the end of their shift.
Subcategory: Concepts of Management
Topic: Leading and Managing Client Care: Quality Improvement Tools for Tracking Outcomes <ul style="list-style-type: none">• Quality improvement helps to assess performance deficiencies, analyze outcomes, and figure out ways to improve the quality of care.• Structured tools are used to track the outcomes and further improve the quality of care.• Some examples of quality improvement tools are algorithms, clinical pathways, protocols, and guidelines.
Subcategory: Establishing Priorities
Topic: Leading and Managing Client Care: Priority Action for a Group of Clients <ul style="list-style-type: none">• The nurse has to make decisions and establish priorities on which clients to see and what tasks should be done first.• There are many different prioritization principles a nurse should use to determine their actions.• Some examples include prioritizing acute illness over chronic, actual problems over potential problems, and systemic illness over local.
Subcategory: Case Management
Topic: Airway Management: Discharge Planning for a Client Who Has a Tracheostomy <ul style="list-style-type: none">• The client should perform regular oral care.• The client should use surgical aseptic technique to clean inner cannula.• The client should remove any soiled dressings and use a split gauze dressing under the tracheostomy holder. Topic: Spinal Cord Injury: Discharge Planning for a Client Who Has Paraplegia <ul style="list-style-type: none">• The client should perform coughing and deep breathing exercises daily.• The client should perform passive ROM to the lower extremities.• The client should reposition every 2 hours to prevent pressure ulcers.

Subcategory: Informed Consent**Topic: Professional Practice: Components of Consent**

- Informed consent is when the client has been provided with information on their procedure, the risks/benefits, and other options and understands all the information provided.
- The nurse should witness the client's signature and ensure the client understood all information.
- There can also be implied consent where the client complies with instructions provided to them.

Subcategory: Legal Rights and Responsibilities**Topic: Professional Practice: Priority Action to Take When Floating**

- The nurse should notify the nursing supervisor if they are not comfortable floating to an unfamiliar unit they have no experience in.
- The nurse should familiarize themselves with the unit they are floating to.
- The nurse should inform the charge nurse of what they are comfortable with or when they encounter something they have not done before.

Main Category: Safety and Infection Control**Subcategory: Emergency Response Plan****Topic: Culture of Safety in Delivering Care: Triage During a Disaster Drill**

- The nurse should know their agency's emergency operating plan and their role.
- The nurse should be familiar with the different colors assigned to clients during triage, such as red for immediate, yellow for urgent, green for nonurgent, and black for expectant.
- The nurse should also help make decisions on who can be discharged to open up beds.

Main Category: Clinical Judgement**Subcategory: Take Actions****Topic: Leading and Managing Client Care: Delegating Tasks to an AP for Four Clients**

- The nurse should understand the scope of practice of an AP and that it is still their responsibility.
- The nurse should provide clear directions when delegating, such as who should be seen first.
- The nurse should use the five rights of delegation, which are the right task, the right circumstance, the right person, the right direction/communication, and the right supervision/evaluation.

Subcategory: Generate Solutions**Topic: Leading and Managing Client Care: Delegating Tasks to an Assistive Personnel**

- The nurse should be familiar with the AP's scope of practice and their experience/knowledge in performing the tasks.
- The AP can obtain vital signs for stable clients, assist with ADLs, ambulation, and feeding without swallowing precautions.
- The AP can also perform positioning, collect specimens, perform intake/output, and toileting.
