# Individual Performance Profile

## N313 Exam 5 Danville Spring 2022

### Outcomes

Bloom's Taxonomy	No of Points	Individual Score	Description
Apply	24	87.5%	Use information in a variety of situations.
Understand	8	87.5%	Explain the meaning of information.
Remember	17	88.2%	Recall relevant information.

Body Function	No of Points	Individual Score	Description
Cardiac Output and Tissue Perfusion	4	100.0%	The anatomical structures (heart, blood vessels, and blood) and body functions that support adequate cardiac output and perfusion of body tissues.
Cognition and Sensation	17	82.4%	The anatomical structures (brain, central and peripheral nervous systems, eyes and ears) and body functions that support perception, interpretation, and response to internal and external stimuli.
Mobility	28	89.3%	The anatomical structures (bones, joints, and muscles) and body functions that support the body and provide its movement.

BSN Essentials	No of Points	Individual Score	Description
Baccalaureate Generalist Nursing Practice	49	89.8%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.

NCLEX RN	No of Points	Individual Score	Description
RN Management of Care	45	86.7%	The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients.
RN Physiological Adaptation	5	100.0%	The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.

# Individual Performance Profile

## N313 Exam 5 Danville Spring 2022

Nursing Process	No of Points	Individual Score	Description
RN Assessment	22	81.8%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	23	91.3%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Implementation/Therapeutic Nursing Intervention	3	100.0%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.

QSEN	No of Points	Individual Score	Description
Patient-Centered Care	48	87.5%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	2	100.0%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.

Thinking Skills	No of Points	Individual Score	Description
Foundational Thinking	26	88.5%	The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding.
Clinical Application	24	87.5%	The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.
