Time Use And Score

	Date	Time
Virtual Application: Claudia Pacheco - Simulation	01/21/2025	19 min

Simulation

Scenario	In this virtual simulation, you cared for Claudia Pacheco, who was an older adult. The goal was to complete a head-to-toe health assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You met the requirements to complete this virtual health assessment scenario.	Score: 92.5%
Interventions Performed	Offer antiemetics <i>You successfully identified the need to offer antiemetics to promote comfort.</i>	
	Client education - Safety <i>You successfully identified the need to provide client teaching about promoting environmental safety in the home.</i>	
	Client education - Nutrition <i>You successfully identified the need to provide client teaching about measures to improve nutrition and fluid intake.</i>	
	Offer to reposition <i>You successfully identified the need to offer to reposition the client to promote comfort.</i>	

Essential Actions

Required actions - 39 of 41 correctly selected

Congratulations! You have demonstrated a thorough understanding of the required actions to complete a head-to-toe health assessment based on this client's health status. You demonstrated an understanding of the following required actions: auscultating the abdomen, auscultating the anterior chest, auscultating the posterior chest, communicating with the client to elicit additional information, inspecting the abdomen, inspecting the anterior chest, inspecting the head and neck, inspecting the lower extremities, inspecting the posterior chest, inspecting the upper extremities, palpating the abdomen, palpating the lower extremities, palpating the upper extremities, preparing the environment, providing privacy.

Spend time reviewing:

- When to close the curtain
- When to sanitize hands when completing client care

Interactive actions - 9 of 11 performed correctly

You demonstrated a basic understanding of assessment techniques within the head-to-toe health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: auscultating heart sounds, inspecting capillary refill, palpating dorsalis pedis pulse, palpating radial pulse, palpating skin temperature, palpating the abdomen.

Spend time reviewing the following assessment techniques:

- Auscultating bowel sounds
- Auscultating breath sounds of the posterior chest

Expected/unexpected findings - 27 of 27 correctly identified

You demonstrated a thorough understanding of the expected and unexpected findings from the head-to-toe health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: auscultating the abdomen, auscultating the anterior chest, auscultating the posterior chest, inspecting skin turgor, inspecting the abdomen, inspecting the anterior chest, inspecting the head and neck, inspecting the lower extremities, inspecting the posterior chest, inspecting the upper extremities, palpating the abdomen, palpating the lower extremities, palpating the upper extremities.

Neutral Actions

Neutral actions - 1 selected

Neutral actions do not help or harm the client.

- *Only* questions specifically related to the client's healthcare needs are necessary.
- *Only* steps related to a head-to-toe health assessment are necessary.

Actions of Concern	Detrimental To Health Status - 1 selected You selected one or more actions that could cause harm and should not be completed based on this client's health status. Performing this assessment can further damage the client's injured hip and cause pain.
	Order violations - 2 selected Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.
