## Simulation

<b>Scenario</b>		
In this virtual simulation, you cared for Doris Anderson. The goal was to complete a focused cardiovascular assessment. Review your results below to determine how your performance aligned with the goals of this simulation.		
<b>Overall Performance</b>		<b>Score: 42.4%</b>
You did not meet the requirements to complete this virtual health assessment scenario. Remediation is recommended before attempting this scenario again.		

**Essential Actions****Required actions - 10 of 20 correctly selected**

You did not demonstrate a basic understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: auscultating the anterior chest, communicating with the client to elicit additional information.

Spend time reviewing:

- Inspecting capillary refill of the lower extremities
- Inspecting capillary refill of the upper extremities
- Inspecting edema of the lower extremities
- Inspecting skin of the lower extremities
- Inspecting skin of the upper extremities
- Palpating dorsalis pedis pulse
- Palpating radial pulse
- Palpating skin temperature of the lower extremities
- Palpating skin temperature of the upper extremities
- When to sanitize hands when completing client care

**Interactive actions - 2 of 8 performed correctly**

You did not demonstrate a basic understanding of assessment techniques within the focused health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: auscultating apical pulse, auscultating heart sounds.

Spend time reviewing the following assessment techniques:

- Inspecting capillary refill of the lower extremities
- Inspecting capillary refill of the upper extremities
- Palpating dorsalis pedis pulse
- Palpating radial pulse
- Palpating skin temperature of the lower extremities
- Palpating skin temperature of the upper extremities

**Expected/unexpected findings - 2 of 11 correctly identified**

You did not demonstrate a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: auscultating the anterior chest.

Spend time reviewing the expected and unexpected findings of the following:

- Inspecting capillary refill of the lower extremities
- Inspecting capillary refill of the upper extremities
- Inspecting edema of the lower extremities
- Inspecting skin of the lower extremities
- Inspecting skin of the upper extremities
- Palpating dorsalis pedis pulse
- Palpating radial pulse
- Palpating skin temperature of the lower extremities
- Palpating skin temperature of the upper extremities

<b>Neutral Actions</b>	<b>Neutral actions - 2 selected</b> Neutral actions do not help or harm the client. <ul style="list-style-type: none"> <li>• <i>Only</i> questions specifically related to the focused cardiovascular assessment are necessary.</li> <li>• <i>Only</i> steps specifically related to the focused cardiovascular assessment are necessary.</li> </ul>
<b>Actions of Concern</b>	<b>Order violations - 1 selected</b> Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to place or remove gloves when required; or fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.
