Time Use And Score		
	Date	Time
Virtual Application: Lea Seko - Simulation	10/04/2025	21 min

Simulation		
Scenario	In this virtual simulation, you cared for Lea Seko. The goal was to complete a focused respiratory assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You did not meet the requirements to complete this virtual health assessment scenario. Remediation is recommended before attempting this scenario again.	Score: 63.2%
Essential Actions	Required actions - 13 of 19 correctly selected You did not demonstrate a basic understanding of the required actions to complete a focused health assessment based on this client's health status.You demonstrated an understanding of the following required actions: auscultating the anterior chest,auscultating the posterior chest,communicating with the client to elicit additional information,providing infection control and safety. Spend time reviewing: - Inspecting skin of the anterior chest - Inspecting skin of the head and neck - Inspecting skin of the posterior chest - Inspecting skin of the upper extremities - Inspecting symmetry of the anterior chest - Inspecting symmetry of the posterior chest	

Essential Actions	Interactive actions - 1 of 2 performed correctly You did not demonstrate a basic understanding of assessment techniques within the focused health assessment based on this client's health status. Spend time reviewing the following assessment techniques: • Auscultating breath sounds of the posterior chest Expected/unexpected findings - 3 of 9 correctly identified You did not demonstrate a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: auscultating the anterior chest, auscultating the posterior chest. Spend time reviewing the expected and unexpected findings of the following: • Inspecting skin of the anterior chest • Inspecting skin of the head and neck • Inspecting skin of the posterior chest • Inspecting skin of the upper extremities • Inspecting symmetry of the anterior chest • Inspecting symmetry of the posterior chest
Neutral Actions	Neutral actions - 0 selected Neutral actions do not help or harm the client. • <i>Only</i> questions specifically related to the focused respiratory assessment are necessary. • <i>Only</i> steps specifically related to the focused respiratory assessment are necessary.
Actions of Concern	Order violations - 0 selected Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to place or remove gloves when required; or fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.
