Shirley Williamson: Bronchitis - Simulation	10/07/2025	34 min

Simulation		
Scenario	In this virtual simulation, you cared for Shirley Williamson. The goal was to complete a focused respiratory and skin assessment and intervene based on the client's needs. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You did not meet the requirements to complete this virtual health assessment scenario. Remediation is recommended before attempting this scenario again.	Score: 66.5%
Interventions Performed	<p>Apply oxygen</p> <p><i>You successfully identified the need to apply oxygen to improve the client's oxygen saturation level.</i></p> <hr/> <p>Elevate head of bed</p> <p><i>You successfully identified the need to elevate the head of bed to improve the client's oxygenation.</i></p>	
Essential Actions	<p>Required actions - 19 of 24 correctly selected</p> <p>You have demonstrated a basic understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: auscultating the anterior chest, auscultating the posterior chest, communicating with the client to elicit additional information, inspecting the head and neck, inspecting the posterior chest, inspecting the upper extremities, preparing the environment, providing privacy.</p> <p>Spend time reviewing:</p> <ul style="list-style-type: none"> Inspecting edema of the lower extremities Inspecting skin of the abdomen Inspecting turgor of the anterior chest When to close the curtain When to sanitize hands when completing client care <p>Interactive actions - 1 of 2 performed correctly</p> <p>You did not demonstrate a basic understanding of assessment techniques within the focused health assessment based on this client's health status.</p> <p>Spend time reviewing the following assessment techniques:</p> <ul style="list-style-type: none"> Auscultating breath sounds of the posterior chest 	

<p>Essential Actions</p>	<p>Expected/unexpected findings - 5 of 11 correctly identified</p> <p>You did not demonstrate a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: inspecting the head and neck, inspecting the posterior chest.</p> <p>Spend time reviewing the expected and unexpected findings of the following:</p> <ul style="list-style-type: none"> • Auscultating breath sounds of the anterior chest • Auscultating breath sounds of the posterior chest • Inspecting edema of the lower extremities • Inspecting skin of the abdomen • Inspecting skin of the upper extremities • Inspecting turgor of the anterior chest
<p>Neutral Actions</p>	<p>Neutral actions - 5 selected</p> <p>Neutral actions do not help or harm the client.</p> <ul style="list-style-type: none"> • <i>Only</i> questions specifically related to the focused respiratory and skin assessment are necessary. • <i>Only</i> steps specifically related to the focused respiratory and skin assessment are necessary.
<p>Actions of Concern</p>	<p>Delay treatment - 1 selected</p> <p>You selected one or more actions that would delay treatment and should not be completed based on this client's health status. Delay of treatment can occur when asking unessential questions or performing assessments that do not address the client's immediate healthcare needs.</p> <hr/> <p>Order violations - 7 selected</p> <p>Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to place or remove gloves when required; or fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.</p>
