

N321 Adult Health I

Clinical Reflection Form

Name: Hadley Jones

Date: 10/09/2025

Mid Term Journal

1. Discuss how you are feeling so far in clinical?

I am enjoying clinical so far. I especially enjoy taking the skills that I have learned and applying them to real-life situations and patients.

2. What have been good experiences?

Good experiences that I have had would be inserting my first IV in the ED and being on the ACU floor, because all the nurses were very nice and helpful, and taught me things that will benefit me if those situations occur. I enjoyed being on the ED more than I thought I would. I thought it was a cool experience as well.

3. Have there been any bad experiences? Are you nervous about a skill or communication?

There have not been any bad experiences that I have had. At first, I was nervous about inserting an IV, but now, I feel better about that skill. I believe that my communication is appropriate, but there is always room for improvement with this skill because I do come off as shy.

4. Do you need to talk with anyone in private to discuss clinical?

No, I do not need to talk with anyone in private to discuss clinical.

5. Is there anything else you would like to mention?

No, there is nothing else I would like to mention.
