## EHR Chart

<b>Instructor Review Status</b>	Not Reviewed
<b>Instructor Review</b>	This chart has not been reviewed by the instructor. This report will populate with additional information when the status has changed.
<b>Instructor Feedback</b>	You can view instructor feedback and, if your instructor has enabled it, the expert chart by accessing the online version of this report.

## Time Use And Score

	Date	Time
Virtual Application: Darian Oduya - Simulation	10/28/2025	18 min

## Simulation

<b>Scenario</b>	In this virtual simulation, you cared for Darian Oduya, who was admitted to the hospital yesterday with cellulitis. The goal was to complete a head-to-toe health assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
<b>Overall Performance</b>	You met the requirements to complete this virtual health assessment scenario.	<b>Score: 88.5%</b>
<b>Interventions Performed</b>	<b>Client education - No touching</b>	
	1 You successfully identified the need to provide client teaching about avoid touching the effected area to promote healing.	
<b>Interventions Performed</b>	<b>Offer to reposition</b>	
	1 You successfully identified the need to offer to reposition the client to promote comfort.	

**Essential Actions****Required actions - 37 of 40 correctly selected**

Congratulations! You have demonstrated a thorough understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: Auscultating the abdomen,Auscultating the anterior chest,Auscultating the posterior chest,Communicating with the client to elicit additional information,Inspecting the anterior chest,Inspecting the head and neck,Inspecting the upper extremities,Palpating the abdomen,Palpating the lower extremities,Preparing the environment,Preparing to leave the room,Providing infection control and safety,Providing privacy.

Spend time reviewing:

- Inspecting range of motion and palpating muscle strength of the lower extremities
- Inspecting skin of the abdomen
- Inspecting skin of the posterior chest

**Interactive actions - 8 of 10 performed correctly**

You demonstrated a basic understanding of assessment techniques within the focused health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: Auscultating breath sounds,Auscultating heart sounds,Inspecting capillary refill,Palpating dorsalis pedis pulse,Palpating skin temperature,Palpating the abdomen.

Spend time reviewing the following assessment techniques:

- Auscultating apical pulse
- Auscultating bowel sounds

**Expected/unexpected findings - 20 of 26 correctly identified**

You did not demonstrate a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: Auscultating the abdomen,Auscultating the posterior chest,Inspecting the anterior chest,Inspecting the upper extremities,Palpating the abdomen,Palpating the lower extremities.

Spend time reviewing the expected and unexpected findings of the following:

- Ascultating apical pulses
- Inspecting facial expressions
- Inspecting range of motion and palpating muscle strength of the lower extremities
- Inspecting skin of the abdomen
- Inspecting skin of the posterior chest
- Inspecting symmetry of the lower extremities

<b>Neutral Actions</b>	<b>Neutral actions - 0 selected</b> Neutral actions do not help or harm the client. <ul style="list-style-type: none"> <li>• <i>Only</i> questions specifically related to the client's healthcare needs are necessary.</li> <li>• <i>Only</i> steps related to a head-to-toe health assessment are necessary.</li> </ul>
<b>Actions of Concern</b>	<b>Order violations - 2 selected</b> Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.
