EHR Chart

Instructor Review Status	Not Reviewed
Instructor Review	This chart has not been reviewed by the instructor. This report will populate with additional information when the status has changed.
Instructor Feedback	You can view instructor feedback and, If your instructor has enabled it, the expert chart by accessing the online version of this report.

Time Use And Score

	Date	Time
Virtual Application (Newborn): Amelia Kane - Simulation	11/02/2025	24 min

Simulation

Scenario	In this virtual simulation, you cared for Amelia Kane, who was a newborn. The goal was to complete a head-to-toe health assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You met the requirements to complete this virtual health assessment scenario.	Score: 95.8%

Essential Actions

Required actions - 36 of 37 correctly selected

Congratulations! You have demonstrated a thorough understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: Assessing oxygen saturation level, Auscultating the abdomen, Auscultating the anterior chest, Auscultating the posterior chest, Inspecting the abdomen, Inspecting the anterior chest, Inspecting the genitalia, Inspecting the head and neck, Inspecting the lower extremities, Inspecting the posterior chest, Palpating the abdomen, Palpating the head and neck, Palpating the lower extremities, Palpating the upper extremities, Providing infection control and safety.

Spend time reviewing:

- Inspecting skin of the upper extremities

Interactive actions - 7 of 9 performed correctly

You did not demonstrate a basic understanding of assessment techniques within the focused health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: Auscultating the anterior chest, Auscultating the posterior chest, Inspecting the lower extremities, Inspecting the upper extremities, Palpating the abdomen.

Spend time reviewing the following assessment techniques:

- Auscultating bowel sounds
- Inspecting pupillary light reflex

Expected/unexpected findings - 33 of 34 correctly identified

You demonstrated a thorough understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: Assessing oxygen saturation level, Auscultating the abdomen, Auscultating the anterior chest, Auscultating the posterior chest, Inspecting the abdomen, Inspecting the anterior chest, Inspecting the genitalia, Inspecting the head and neck, Inspecting the lower extremities, Inspecting the posterior chest, Palpating the abdomen, Palpating the head and neck, Palpating the lower extremities, Palpating the upper extremities.

Spend time reviewing the expected and unexpected findings of the following:

- Inspecting skin of the upper extremities

Neutral Actions

Neutral actions - 5 selected

Neutral actions do not help or harm the client.

- *Only* questions specifically related to the client's healthcare needs are necessary.
- *Only* steps related to a head-to-toe health assessment are necessary.

Actions of Concern	Order violations - 1 selected Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.

Time Use And Score		
	Date	Time
Virtual Application (Maternal): Alyssa Kane - Simulation	11/02/2025	12 min

Simulation		
Scenario	In this virtual simulation, you cared for Alyssa Kane, who was in labor. The goal was to complete a focused assessment of a client who was in labor, including fetal heart monitoring. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You did not meet the requirements to complete this virtual health assessment scenario. Remediation is recommended before attempting this scenario again.	Score: 45.2%

Essential Actions**Required actions - 11 of 23 correctly selected**

You did not demonstrate a basic understanding of the required actions to complete a focused health assessment based on this client's health status. You demonstrated an understanding of the following required actions: Assessing oxygen saturation level, Inspecting the abdomen, Inspecting the posterior chest, Inspecting the upper extremities, Palpating the abdomen, Preparing the environment, Providing privacy.

Spend time reviewing:

- Assessing the indwelling catheter
- Auscultating heart sounds
- Communicating with the client to ask about general status
- Communicating with the client to ask about pain
- Inspecting respiratory status of the anterior chest
- Palpating dilation
- Palpating effacement
- Palpating station
- When to close the curtain
- When to lower the bed height
- When to raise the side rail
- When to sanitize hands when completing client care

Interactive actions - 0 of 2 performed correctly

You did not demonstrate a basic understanding of assessment techniques within the focused health assessment based on this client's health status.

Spend time reviewing the following assessment techniques:

- Auscultating breath sounds of the anterior chest
- Auscultating heart sounds

Expected/unexpected findings - 6 of 12 correctly identified

You did not demonstrate a basic understanding of the expected and unexpected findings from the focused health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: Assessing oxygen saturation level, Inspecting the abdomen, Inspecting the posterior chest, Inspecting the upper extremities, Palpating the abdomen.

Spend time reviewing the expected and unexpected findings of the following:

- Assessing the indwelling catheter
- Auscultating heart sounds
- Inspecting respiratory status of the anterior chest
- Palpating dilation
- Palpating effacement
- Palpating station

<p>Neutral Actions</p>	<p>Neutral actions - 18 selected</p> <p>Neutral actions do not help or harm the client.</p> <ul style="list-style-type: none"> • <i>Only</i> questions specifically related to the client's healthcare needs are necessary. • <i>Only</i> steps specifically related to the focused assessment of a client who was in labor, including fetal heart monitoring are necessary.
<p>Actions of Concern</p>	<p>Order violations - 3 selected</p> <p>Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.</p>
