<b>Assessment of Client/Family (5 points)</b>	<b>Nursing Diagnosis &amp; Goal of Teaching (5 points)</b>	<b>Interventions (5 points)</b>	<b>Methods/Teaching Tools (2 points)</b>	<b>Evaluation (3 points)</b>

<p><b>Level of motivation for learning:</b> This patient has a high level of motivation for learning, because they want to regain independence and return to their normal routine.</p> <p><b>Barriers to effective learning:</b> The patient is alert and orientedx4 and presented with no notable barriers to effective learning.</p> <p><b>Health beliefs/values:</b> This patient highly values their health, and they are putting a lot of effort into becoming independent again. The patient possesses a very independent mind set.</p> <p><b>Psychosocial development:</b> The patient’s psychosocial development is generativity vs. stagnation. They have a strong desire to regain independence and resume contributing to their family and the community.</p>	<p><b>Nursing Diagnosis:</b> Risk for delayed wound healing related to immobility and poor nutrition as evidenced by tissue destruction extending into deeper layers.</p> <p><b>Goal of Teaching:</b> The goal of this teaching session is to teach the patient to change position at least every two hours, and to increase protein, vitamins, zinc and fluid intake to prevent their current sacral decubitus ulcer from expanding.</p>	<p><b>Intervention 1:</b> Reposition the patient every two hours in bed.</p> <p><b>Intervention 2:</b> Provide the patient with written information on how to maintain a proper diet to promote wound healing.</p> <p><b>Intervention 3:</b> Teach the patient and their support person how to keep the wound clean and dry, and make sure they understand their dressing schedule change.</p>	<p><b>Method 1:</b> Educational conversation with ample time allotted for questions and answers with the patient.</p> <p><b>Method 2:</b> Written materials were provided to the patient concerning what foods they should increase and which to avoid helping promote fast wound healing.</p>	<p><b>Discuss how the client/family received the teaching:</b></p> <p><b>The client and their support person responded well to the teaching and seemed eager to implement it.</b></p> <p><b>Identify strengths/weaknesses of the client or family in receiving teaching:</b></p> <p>The patient and their support person were very attentive and responded well to the teaching.</p> <p><b>Suggest modifications to improve teaching plan (what would have improved the plan?):</b> <b>I could have spent more time with the patient’s support person and looked deeper into their understanding of basic body mechanics.</b></p>
--	---	--	--	---

**Cognitive development:**

This patient's cognitive development level is formal operational. The patient can understand what their obstacles are and working systematically to overcome them.
