Time Use And Score

	Date	Time
Virtual Application: Claudia Pacheco - Simulation	01/20/2026	1 hr 32 min

Simulation

Scenario	In this virtual simulation, you cared for Claudia Pacheco, who was an older adult. The goal was to complete a head-to-toe health assessment. Review your results below to determine how your performance aligned with the goals of this simulation.	
Overall Performance	You did not meet the requirements to complete this virtual health assessment scenario. Remediation is recommended before attempting this scenario again.	Score: 53.4%
Interventions Performed	Offer emesis bag <i>You successfully identified the need to offer an emesis bag to reduce the risk of exposure to body fluids and provide psychological comfort to the client.</i>	
	Offer antiemetics <i>You successfully identified the need to offer antiemetics to promote comfort.</i>	
	Client education - Safety <i>You successfully identified the need to provide client teaching about promoting environmental safety in the home.</i>	

Interventions Performed	Client education - Nutrition <i>You successfully identified the need to provide client teaching about measures to improve nutrition and fluid intake.</i>
	Offer to reposition <i>You successfully identified the need to offer to reposition the client to promote comfort.</i>
Essential Actions	Required actions - 26 of 41 correctly selected You did not demonstrate a basic understanding of the required actions to complete a head-to-toe health assessment based on this client's health status. You demonstrated an understanding of the following required actions: auscultating the abdomen, auscultating the anterior chest, auscultating the posterior chest, communicating with the client to elicit additional information, inspecting the abdomen, inspecting the head and neck, inspecting the posterior chest, palpating the abdomen, preparing the environment, providing privacy. Spend time reviewing: <ul style="list-style-type: none"> • Assessing respiratory status • Assessing the IV site • Inspecting capillary refill of the lower extremities • Inspecting capillary refill of the upper extremities • Inspecting skin of the anterior chest • Inspecting symmetry of the anterior chest • Inspecting symmetry of the lower extremities • Inspecting symmetry of the upper extremities • Palpating radial pulses • Palpating skin temperature of the lower extremities • Palpating skin temperature of the upper extremities • When to close the curtain • When to lower the bed height • When to raise the side rail • When to sanitize hands when completing client care Interactive actions - 3 of 11 performed correctly You did not demonstrate a basic understanding of assessment techniques within the head-to-toe health assessment based on this client's health status. You demonstrated an understanding of the following assessment techniques: auscultating heart sounds, palpating dorsalis pedis pulse, palpating the abdomen. Spend time reviewing the following assessment techniques: <ul style="list-style-type: none"> • Auscultating bowel sounds • Auscultating breath sounds of the anterior chest • Auscultating breath sounds of the posterior chest • Inspecting capillary refill of the lower extremities • Inspecting capillary refill of the upper extremities • Palpating radial pulses • Palpating skin temperature of the lower extremities • Palpating skin temperature of the upper extremities

<p>Essential Actions</p>	<p>Expected/unexpected findings - 11 of 27 correctly identified</p> <p>You did not demonstrate a basic understanding of the expected and unexpected findings from the head-to-toe health assessment based on this client's health status. You demonstrated an understanding of the expected and unexpected findings of the following: inspecting skin turgor, inspecting the abdomen, inspecting the head and neck, inspecting the posterior chest, palpating the abdomen. Spend time reviewing the expected and unexpected findings of the following:</p> <ul style="list-style-type: none"> • Assessing the IV site • Auscultating bowel sounds • Auscultating breath sounds of the anterior chest • Auscultating breath sounds of the posterior chest • Inspecting capillary refill of the lower extremities • Inspecting capillary refill of the upper extremities • Inspecting range of motion and palpating muscle strength of the lower extremities • Inspecting respiratory status of the anterior chest • Inspecting skin of the anterior chest • Inspecting skin of the lower extremities • Inspecting symmetry of the anterior chest • Inspecting symmetry of the lower extremities • Inspecting symmetry of the upper extremities • Palpating radial pulses • Palpating skin temperature of the lower extremities • Palpating skin temperature of the upper extremities
<p>Neutral Actions</p>	<p>Neutral actions - 8 selected</p> <p>Neutral actions do not help or harm the client.</p> <ul style="list-style-type: none"> • <i>Only</i> questions specifically related to the client's healthcare needs are necessary. • <i>Only</i> steps related to a head-to-toe health assessment are necessary.
<p>Actions of Concern</p>	<p>Delay Treatment - 1 selected</p> <p>You selected one or more actions that would delay treatment and should not be completed based on this client's health status. Delay of treatment can occur when asking unessential questions or performing assessments that do not address the client's immediate healthcare needs.</p> <hr/> <p>Order violations - 6 selected</p> <p>Order violations occur when you move through the sequence of body areas in the incorrect order; move through the assessment techniques of inspection, palpation, and auscultation in the incorrect order; fail to provide for privacy or safety considerations before initiating or concluding a health assessment scenario.</p>
