

Individual Performance Profile

RN ATI Capstone Adult Medical Surgical 1

Individual Name: **ANISHA COLEMAN**
 Student Number: **8275644**
 Institution: **Lakeview CON**
 Program Type: **BSN**
 Test Date: **2/6/2026**

Individual Score: **54.4%**
 Practice Time: **1 hr 4 min**
 Focused Review Time: **1 hr 18 min**
 Focused Review Quiz Result

Individual Performance in the Major Content Areas

Sub-Scale	# Items	# Points	Individual Score	Individual Score (% Correct)										
				1	10	20	30	40	50	60	70	80	90	100
Management of Care	3	3	33.3%				▲							
Safety and Infection Control	4	4	25.0%			▲								
Health Promotion and Maintenance	1	3	33.3%				▲							
Psychosocial Integrity	2	2	100.0%											▲
Basic Care and Comfort	4	4	75.0%									▲		
Pharmacological and Parenteral Therapies	7	7	85.7%										▲	
Reduction of Risk Potential	8	10	60.0%							▲				
Physiological Adaptation	11	15	46.7%						▲					
Clinical Judgment	10	42	52.4%							▲				

Topics To Review

Management of Care (2 items)

Establishing Priorities (1 item)

Priority Client for Nurse to Assess (Active Learning Template - Basic Concept)

Case Management (1 item)

Initiating a Plan of Care (Active Learning Template - System Disorder)

Safety and Infection Control (3 items)

Accident/Error/Injury Prevention (3 items)

Community Teaching About First Aid for Snake Bites (Active Learning Template - Basic Concept)

Priority Action for a Client Who Has a Cerebellar Tumor (Active Learning Template - System Disorder)

Teaching a Client About a Bone Marrow Biopsy (Active Learning Template - Diagnostic Procedure)

Health Promotion and Maintenance (1 item)

Health Promotion/Disease Prevention (1 item)

Communicable Disease Prevention for an Adult Client (Active Learning Template - Basic Concept)

Basic Care and Comfort (1 item)

Elimination (1 item)

Identifying Type of Urinary Incontinence (Active Learning Template - System Disorder)

Topics To Review

Pharmacological and Parenteral Therapies (1 item)

Adverse Effects/Contraindications/Side Effects/Interactions (1 item)

Adverse Effects of NSAIDs (Active Learning Template - Medication)

Reduction of Risk Potential (4 items)

Potential for Complications of Diagnostic Tests/Treatments/Procedures (1 item)

Client Instructions Following a Liver Biopsy (Active Learning Template - Diagnostic Procedure)

Laboratory Values (1 item)

Teaching About Fecal Occult Blood Testing (Active Learning Template - Diagnostic Procedure)

System-Specific Assessments (1 item)

Priority Findings of Guillain-Barré Syndrome (Active Learning Template - System Disorder)

Therapeutic Procedures (1 item)

Discharge Teaching Following Chemotherapy (Active Learning Template - Therapeutic Procedure)

Physiological Adaptation (6 items)

Fluid and Electrolyte Imbalances (1 item)

Syndrome of Inappropriate Antidiuretic Hormone (Active Learning Template - System Disorder)

Alterations in Body Systems (1 item)

Client Education About GERD (Active Learning Template - System Disorder)

Unexpected Response to Therapies (1 item)

Complications of a Mild Traumatic Brain Injury to Report to the Provider (Active Learning Template - System Disorder)

Illness Management (3 items)

Interventions for Ménière's Disease (Active Learning Template - System Disorder)

Planning Interventions for an Acute Attack (Active Learning Template - System Disorder)

Teaching About Polycystic Kidney Disease (Active Learning Template - System Disorder)

Clinical Judgment (9 items)

Evaluate Outcomes (1 item)

Evaluating Understanding of Teaching (Active Learning Template - System Disorder)

Take Actions (1 item)

Taking Action for a Client Who Is Experiencing Abdominal Pain (Active Learning Template - System Disorder)

Analyze Cues (3 items)

Analyzing Cues for a Client Who Has Hepatitis B (Active Learning Template - System Disorder)

Identifying Manifestations of Peripheral Arterial Disease and Peripheral Venous Disease (Active Learning Template - System Disorder)

Identifying Potential Complications of Systemic Lupus Erythematosus (Active Learning Template - System Disorder)

Prioritize Hypotheses (1 item)

Prioritizing Hypotheses Using the Evidence-Based Practice Priority Setting (Active Learning Template - Nursing Skill)

Generate Solutions (2 items)

Caring for a Client Following a Small Bowel Resection for Crohn's Disease (Active Learning Template - System Disorder)

Caring for a Client Who Has Manifestations of Peripheral Vascular Disease (Active Learning Template - Diagnostic Procedure)

Recognize Cues (1 item)

Identifying Modifiable Risk Factors for a Peripheral Vascular Disorder (Active Learning Template - System Disorder)

Outcomes

Nursing Process	No of Points	Individual Score	Description
RN Assessment	9	66.7%	The assessment step of the nursing process involves application of nursing knowledge to the collection, organization, validation and documentation of data about a client's health status. The nurse focuses on the client's response to a specific health problem including the client's health beliefs and practices. The nurse thinks critically to perform a comprehensive assessment of subjective and objective information. Nurses must have excellent communication and assessment skills in order to plan client care.
RN Analysis/Diagnosis	26	46.2%	The analysis step of the nursing process involves the nurse's ability to analyze assessment data to identify health problems/risks and a client's needs for health intervention. The nurse identifies patterns or trends, compares the data with expected standards or reference ranges and draws conclusions to direct nursing care. The nurse then frames nursing diagnoses in order to direct client care.
RN Planning	16	43.8%	The planning step of the nursing process involves the nurse's ability to make decisions and problem solve. The nurse uses a client's assessment data and nursing diagnoses to develop measurable client goals/outcomes and identify nursing interventions. The nurse uses evidenced based practice to set client goals, establish priorities of care, and identify nursing interventions to assist the client to achieve his goals.
RN Implementation/Therapeutic Nursing Intervention	34	61.8%	The implementation step of the nursing process involves the nurse's ability to apply nursing knowledge to implement interventions to assist a client to promote, maintain, or restore his health. The nurse uses problem-solving skills, clinical judgment, and critical thinking when using interpersonal and technical skills to provide client care. During this step the nurse will also delegate and supervise care and document the care and the client's response.
RN Evaluation	5	60.0%	The evaluation step of the nursing process involves the nurse's ability to evaluate a client's response to nursing interventions and to reach a nursing judgment regarding the extent to which the client has met the goals and outcomes. During this step the nurse will also assess client/staff understanding of instruction, the effectiveness of interventions, and identify the need for further intervention or the need to alter the plan.

Priority Setting	No of Points	Individual Score	Description
	9	55.6%	Ability to demonstrate nursing judgment in making decisions about priority responses to a client problem. Also includes establishing priorities regarding the sequence of care to be provided to multiple clients.

Thinking Skills	No of Points	Individual Score	Description
Foundational Thinking	4	25.0%	The ability to comprehend information and concepts. Incorporates Blooms Taxonomy categories of Remembering and Understanding.
Clinical Application	44	59.1%	The ability to apply nursing knowledge to a clinical situation. Incorporates Blooms Taxonomy category of Applying.
Clinical Judgment	42	52.4%	The ability to analyze and interpret elements of a clinical situation to make a decision and respond appropriately. Incorporates Blooms Taxonomy categories of Analyzing and Evaluating.

NCLEX®	No of Points	Individual Score	Description
RN Management of Care	3	33.3%	The nurse coordinates, supervises and/or collaborates with members of the health care to provide an environment that is cost-effective and safe for clients.
RN Safety and Infection Prevention and Control	4	25.0%	The nurse uses preventive safety measures to promote the health and well-being of clients, significant others, and members of the health care team.
RN Health Promotion and Maintenance	3	33.3%	The nurse directs nursing care to promote prevention and detection of illness and support optimal health.
RN Psychosocial Integrity	2	100.0%	The nurse directs nursing care to promote and support the emotional, mental and social well-being of clients and significant others.
RN Basic Care and Comfort	4	75.0%	The nurse provides nursing care to promote comfort and assist client to perform activities of daily living.
RN Pharmacological and Parenteral Therapies	7	85.7%	The nurse administers, monitors and evaluates pharmacological and parenteral therapy.
RN Reduction of Risk Potential	10	60.0%	The nurse directs nursing care to decrease clients' risk of developing complications from existing health disorders, treatments or procedures.
RN Physiological Adaptation	15	46.7%	The nurse manages and provides nursing care for clients with an acute, chronic or life threatening illness.

QSEN	No of Points	Individual Score	Description
Safety	18	61.1%	The minimization of risk factors that could cause injury or harm while promoting quality care and maintaining a secure environment for clients, self, and others.
Patient-Centered Care	10	60.0%	The provision of caring and compassionate, culturally sensitive care that is based on a patient's physiological, psychological, sociological, spiritual, and cultural needs, preferences, and values.
Evidence Based Practice	61	50.8%	The use of current knowledge from research and other credible sources to make clinical judgments and provide client-centered care.
Teamwork and Collaboration	1	100.0%	The delivery of client care in partnership with multidisciplinary members of the health care team, to achieve continuity of care and positive client outcomes.

NLN Competency	No of Points	Individual Score	Description
Human Flourishing	8	62.5%	Human flourishing is reflected in patient care that demonstrates respect for diversity, approaches patients in a holistic and patient-centered manner, and uses advocacy to enhance their health and well-being.
Nursing Judgment	74	52.7%	Nursing judgment involves the use of critical thinking and decision making skills when making clinical judgments that promote safe, quality patient care.
Professional Identity	1	100.0%	Professional identity reflects the professional development of the nurse as a member and leader of the health care team who promotes relationship-centered care, and whose practice reflects integrity and caring while following ethical and legal guidelines.
Spirit of Inquiry	7	57.1%	A spirit of inquiry is exhibited by nurses who provide evidence based clinical nursing practice and use evidence to promote change and excellence.

BSN Essentials	No of Points	Individual Score	Description
Liberal Education for Baccalaureate Generalist Nursing Practice	7	71.4%	The need for an education that exposes nurses to multiple fields of study providing the foundation for a global perspective of society as well as high level thinking and acquisition of skills that can be applied to complex patient and system-based problems.
Basic Organization and Systems Leadership for Quality Care and Patient Safety	6	33.3%	The need for nurses to be able to understand power relationships and use decision-making and leadership skills to promote safe practice and quality improvement within health care systems.
Scholarship for Evidence-Based Practice	14	42.9%	The need for nurses to be able to understand the research process and base practice and clinical judgments upon fact-based evidence to enhance patient outcomes.
Interprofessional Communication and Collaboration	1	100.0%	The need for nurses to be able to function as a member of the healthcare team while promoting an environment that supports interprofessional communication and collaboration with the goal of providing patient-centered care.
Clinical Prevention and Population Health	15	53.3%	The need for nurses to be able to identify health related risk factors and facilitate behaviors that support health promotion, and disease and injury prevention, while providing population-focused care that is based on principles of epidemiology and promotes social justice.
Baccalaureate Generalist Nursing Practice	47	57.4%	The need for nurses to be able to practice as a generalist using clinical reasoning to provide care to patients across the lifespan and healthcare continuum and to individuals, families, groups, communities, and populations.

Clinical Judgment	No of Points	Individual Score	Description
Recognize Cues	7	71.4%	Filter information from different sources (i.e., signs, symptoms, health history, environment). Identify relevant information related to the client's condition. Use knowledge, experience and evidence to assess clients. Use verbal, nonverbal, written, and electronic modes of communication. Recognize relevant subjective/objective client data. Identify subtle and apparent changes in client condition and related factors.
Analyze Cues	15	46.7%	Link recognized cues to a client's clinical presentation and establishing probable client needs, concerns, or problems. Compare client findings to evidence-based resources and standards of care. Analyze expected and unexpected findings in health data. Anticipate illness/injury and wellness progression. Identify client problems and related health alterations. Analyze client needs. Identify potential complications. Identify how pathophysiology relates to clinical presentation. Identify data that is of immediate concern.
Prioritize Hypotheses	1	0.0%	Establish priorities of care based on the client's health problems (i.e. environmental factors, risk assessment, urgency, signs/ symptoms, diagnostic test, lab values, etc.). Organize client assessment information according to changes, patterns and trends. Use standards of care and empirical frameworks for priority setting. Establish and prioritize client problems/needs based on the analysis of information and factors.

Generate Solutions	6	33.3%	Identify expected outcomes and related nursing interventions to ensure clients' needs are met. Collaborate with members of the interprofessional healthcare team to establish client outcomes and the plan of care. Collaborate with client and care partners to establish client outcomes and the plan of care. Identify optimal client outcomes based on information and factors. Identify evidence-based nursing actions to effectively address the clinical situation of the client's health problem. Prioritize plan of care to achieve optimal client outcomes. Prioritize nursing care when caring for multiple clients. Re-prioritize nursing actions as the client's condition changes. Modify a plan of care to assure achievement of optimal client outcomes when indicated. Determine the potential impact of selected interventions.
Take Actions	9	55.6%	Implement appropriate interventions based on nursing knowledge, priorities of care, and planned outcomes to promote, maintain, or restore a client's health. Promptly and accurately perform nursing actions based on prioritized client problems. Implement a plan of care in collaboration with members of the interprofessional health care team. Implement a plan of care in collaboration with the client and care partners. Accurately document client care data and information. Incorporate client preferences and needs when performing nursing actions. Provide education to the client and/or care partner(s) regarding their health condition and care management. Participate in coordination of care with the client and healthcare team. Monitor the client's response to interventions.
Evaluate Outcomes	4	75.0%	Evaluate a client's response to nursing interventions and reach a nursing judgment regarding the extent to which outcomes have been met. Reassess client condition to determine achievement of expected outcomes. Evaluate efficacy of nursing actions determine if client outcomes were met. Modify client outcomes and/or nursing actions based on the client's response and clinical findings when indicated. Update and revise the plan of care.

AACN Essentials	No of Points	Individual Score	Description
Knowledge for Nursing Practice	9	66.7%	Integration, translation, and application of established and evolving disciplinary nursing knowledge and ways of knowing, as well as knowledge from other disciplines, including a foundation in liberal arts and natural and social sciences. This distinguishes the practice of professional nursing and forms the basis for clinical judgment and innovation in nursing practice.
Person-Centered Care	72	52.8%	Person-centered care focuses on the individual within multiple complicated contexts, including family and/or important others. Person-centered care is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate. Person-centered care builds on a scientific body of knowledge that guides nursing practice regardless of specialty or functional area.
Population Health	2	50.0%	Population health spans the healthcare delivery continuum from public health prevention to disease management of populations and describes collaborative activities with both traditional and non-traditional partnerships from affected communities, public health, industry, academia, health care, local government entities, and others for the improvement of equitable population health outcomes.
Scholarship for the Nursing Discipline	1	0.0%	The generation, synthesis, translation, application, and dissemination of nursing knowledge to improve health and transform health care.
Quality and Safety	5	60.0%	Employment of established and emerging principles of safety and improvement science. Quality and safety, as core values of nursing practice, enhance quality and minimize risk of harm to patients and providers through both system effectiveness and individual performance.
Interprofessional Partnerships	1	100.0%	Intentional collaboration across professions and with care team members, patients, families, communities, and other stakeholders to optimize care, enhance the healthcare experience, and strengthen outcomes.

Score Explanation and Interpretation

Individual Performance Profile

ITEM SCORING

ATI follows NCSBN guidance for item scoring. Accordingly, each item is worth one or more points. Depending on the item-specific scoring method, a student's response may earn full, partial, or no points.

INDIVIDUAL SCORE

The individual score is the number of points received divided by the number of points on the assessment. It is on a scale of 0% to 100%.

TOPICS TO REVIEW

Based on the questions missed on this assessment, a listing of content areas and topics to review may be provided. A variety of learning resources may be used in the review process, including content, images, animations, and videos in ATI's Content Mastery Series® Review Modules, online practice assessments, and a focused review that is individualized to the questions missed.
