

N321 Adult Health I

Clinical Reflection Form

Name: James Cansen

Date: 3/2

Mid Term Journal

1. Discuss how you are feeling so far in clinical?

Even though we've only had one clinical so far, I've enjoyed it so far. I'm proud of myself for recognizing the patient's bowel obstruction and enjoyed feeling like a nurse for a day.

2. What have been good experiences?

Recognizing the bowel obstruction & doing an IV on the first try ~~was~~ were some good experiences. I also liked ~~seeing~~ accompanying the patient to radiology and seeing how IV contrast for a CT works.

3. Have there been any bad experiences? Are you nervous about a skill or communication?

I don't think there were any bad experiences. I'm still nervous about most skills since I've only done most in Lab and not on a person yet.

4. Do you need to talk with anyone in private to discuss clinical?

NO

5. Is there anything else you would like to mention?

Personally, I don't like eating lunch in the student room. It's too close quarters and I can hear everyone chewing. That's just me but a couple other classmates have said something similar.
