

Lakeview School of Nursing
N405 Leadership and Management
Weekly Clinical Journal

Name: Breanna Schoonover

Date: 01/28/2020

Week 2

Journal of Observations: My clinical site for concept synthesis is at OSF in Champaign. The rotation got mixed up, and they put me with the nurse manager, instead of the RN. However, I was able to learn about the leadership roles her job maintained. The nurse oversees many different leadership aspects associated with her team of RN's on the floor. To start the day, we attended a meeting, learning valuable information about what is going to take place on our floor for the day. Also, we learned about what is going on at the hospitals around us. Next, the nurse manager assessed all the nurses, asking if they had any questions or concerns; they needed to discuss with her. The nurse manager and I continued to observe the nurses and ask if they needed help with anything. We attended meetings that gave information on what floors needed assistance and what was happening on our floor today.

What Leadership and Management skills were

observed? Leadership consists of planning, organizing, directing, and coordinating the work within an organization. Leadership includes inspiring others to achieve desired outcomes. The nurse manager oversaw, looking over the documentation, the nurse charts throughout

the day, making sure she filled in all the essential aspects of documentation. I witnessed leadership to its fullest ability today. The nurse manager accomplished each skill acquired with leadership and performed it with the best attitude. She was willing to coordinate her team while planning and organizing the information obtained throughout the day. Overall, it was a great day of learning.
